

## CONTENTS

I. List of tables.....	01
II. List of figures.....	02
III. Abbreviations.....	04
Abstract.....	05
<b>Chapter 1: Review of literature.....</b>	<b>07</b>
1.1 Plant-pathogen interactions.....	08
1.1.1 Plant defense mechanisms – physical and chemical.....	09
1.1.1.1 Plant cell wall – the primary physical barrier.....	13
1.2 Plant cell wall degrading enzymes (CWDEs).....	17
1.2.1 CWDEs produced by fungi.....	17
1.3 Feruloyl esterases (Fae).....	21
1.3.1 Role of Fae in plant cell wall degradation.....	21
1.3.2 Industrial applications of fungal Fae.....	23
1.4 Rice-blast pathosystem.....	25
1.4.1 A model system to study host-microbe interactions.....	26
1.4.2 <i>Magnaporthe oryzae</i> infection cycle and host invasion strategies.....	27
<b>PRESENT STUDY: Functional characterization of gene(s) involved in pathogenicity of the rice blast fungus <i>Magnaporthe oryzae</i>.....</b>	<b>35</b>
<b>Chapter 2: Introduction, Objectives and Materials and Methods.....</b>	<b>36</b>
2.1 Introduction.....	37
2.2 Objectives.....	40
2.3 Materials and Methods.....	40
2.3.1 Fungal culture and growth conditions.....	40
2.3.2 <i>In silico</i> analysis of fungal <i>FAEs</i> .....	43
2.3.3 DNA isolation and manipulation.....	44
2.3.3.1 Plasmid isolation from <i>E. coli</i> .....	44
2.3.3.2 Genomic DNA isolation from <i>M. oryzae</i> .....	46
2.3.3.3 PCR.....	48
2.3.3.4 Restriction enzyme digestion.....	48
2.3.3.5 Ligation.....	48
2.3.3.6 Southern blot hybridisation.....	49

2.3.4 Protein sample preparation and estimation.....	50
2.3.5 Bacterial and Yeast transformation.....	52
2.3.5.1 Bacterial transformation.....	52
2.3.5.2 Yeast transformation.....	53
2.3.6 <i>Magnaporthe oryzae</i> protoplast transformation.....	54
2.3.7 Yeast Secretion Trap (YST) approach.....	56
2.3.8 Feruloyl esterase enzyme assay.....	57
2.3.9 Quantitative real time reverse transcription PCR (qRT-PCR).....	58
2.3.9.1 Total RNA isolation from <i>M. oryzae</i> .....	58
2.3.9.2 First-strand cDNA synthesis.....	59
2.3.9.3 Quantitative real-time RT-PCR (qRT-PCR).....	60
2.3.10 Plant infection assay.....	60
2.3.11 Host invasion and penetration assay.....	61
2.3.12 Statistical analyses.....	62
<b>Chapter 3: Results.....</b>	<b>64</b>
3.1. <i>In silico</i> and expression analysis of Fae in <i>M. oryzae</i> .....	65
3.1.1 Identification of putative <i>FAEs</i> in <i>M. oryzae</i> by <i>in silico</i> analysis.....	66
3.1.2 Sequence similarity between Fae in <i>M. oryzae</i> .....	68
3.1.3 Phylogenetic analysis of <i>M. oryzae</i> Fae with other fungal Fae.....	69
3.1.4 Prediction of conventional signal peptide in Fae by SignalP tool.....	80
3.1.5 Validation of two <i>FAEs</i> for the presence of signal peptide by YST-approach...	82
3.1.6 Effect of host leaf-extract on fungal Fae activity.....	84
3.1.7 Gene expression profiling of <i>FAEs</i> during pathogenic development in <i>M. oryzae</i> by qRT-PCR.....	87
3.1.7.1 Gene expression analysis under host- or pathogenicity-mimic conditions..	87
3.1.7.2 Gene expression analysis at different stages of pathogenic development...	91
3.2. Investigating the role of a feruloyl esterase (Fae1) in pathogenesis of <i>M. oryzae</i> .....	95
3.2.1 Generation of <i>FAEI</i> deletion mutant ( <i>fae1Δ</i> ) of <i>M. oryzae</i> .....	96
3.2.1.1 Preparation of <i>FAEI</i> deletion cassette and fungal transformation <i>FAEI</i> gene (Gene ID: MGG_08737) deletion.....	96
3.2.1.2 Molecular analysis and confirmation of <i>FAEI</i> deletion mutant ( <i>fae1Δ</i> )	99
3.2.2 <i>fae1Δ</i> shows normal vegetative growth and asexual conidial development....	102
3.2.2.1 Vegetative growth.....	102
3.2.2.2 Asexual development (conidiation).....	102

---

3.2.3 Fae1 function is not required for appressorial development in <i>M. oryzae</i> .....	103
3.2.4 Development of blast disease by <i>M. oryzae</i> is impaired in absence of Fae1.....	104
3.2.5 Fae1 is required specifically for host colonisation by <i>M. oryzae</i> .....	106
3.2.5.1 Invasive growth is impaired in the <i>fae1</i> Δ mutant.....	106
3.2.5.2 Genetic complementation of <i>fae1</i> Δ mutant rescues its host invasion defect.....	109
3.2.5.3 Exogenous addition of the products of Fae enzyme action rescues the host invasion defect of <i>fae1</i> Δ mutant.....	114
3.2.5.4 Ferulic acid most likely serves as an energy/nutrient source.....	120
<b>Chapter 4: Discussion and Conclusion</b> .....	123
Summary.....	134
Bibliography.....	138
Publication.....	153
Oral and poster presentations.....	154
