

## ACKNOWLEDGEMENTS

At the very outset, I wish to express my sincere and deep sense of gratitude to *Dr. Pradeep C. Mankodi*, for proposing this fascinating field for my research and for his inspiring guidance. His sweet smile, evergreen and attractive personality and enthusiastic attitude motivated me to complete my work well in time.

I am thankful to the heads of the department, Prof. R. G. Panicker, Prof. A. V. Ramachandran and Dr. G. S. Padate for extending necessary laboratory facilities and relieving me from duties assigned in department during my field studies. I also thank Dr. Kauresh D. Vachhrajani for promoting me to think beyond ordinary and pursue the goals with all enthusiasm.

I sincerely acknowledge the award of *“Research Fellowship in Science for Meritorious Students”* of University Grants Commission, New Delhi. It was a great financial support to carry out the long running and expensive field work.

I am thankful to Shri D. S. Narve, IFS then Conservator of Forests, Shri P. H. Sata, Dy. Conservator of Forests and Shri R. D. Kamboj, IFS Chief Conservator of Forest of Marine National Park, Jamnagar for encouraging me to take up research work in Marine National Park and facilitating me by extending necessary permissions for the same. I would like to acknowledge the guidance and constant encouragement provided by Shri Bhanushankar H. Dave, Range Forest Officer – Sikka Range and his team Shri M. M. Joshi, Shri Husain Gad and Shri Ramesh Yadav for their support during my field visits. I can not overlook the welcome extended by all the staff of Marine National Park and they are equally entitled for due acknowledgment.

I am highly thankful to Shri B. K. Shilu of Marine National Park. It was not at all possible for me to explore the marine environment fearlessly without his sharing of wider experience with me. I am also indebted to Shri M. I. Patel for teaching me the art of coral taxonomy. I cherish his wholehearted help and guidance during my work.

I gratefully acknowledge the help extended by Dr. D. G. Fautin, Professor at Ecology and Evolutionary Biology Curator, Natural History Museum (Biodiversity Institute)

University of Kansas, USA for confirming the identification of corallimorpharians species and sea anemone species based on specimen photographs.

My fellow researchers of the department Smt. Seema Verma, Shri Pranav J. Pandya, Ku. Ankita N. Parikh, Shri Mayurdan K. Gadhavi who always suggested me new ideas during discussions and also ease my work with their cheerful attitudes. I would like to acknowledge the inspirations from Ku. Vrunda A. Sura during preparation of the manuscript of this thesis. I also thank Ku. Kinjal D. Pathak for her help in compiling some of the text. It was a great help from Ku. Khushali M. Pandya in proof reading of the manuscript which made my last mile work easy.

It would be my great failure if I forget to remember my teachers Shri Dinesh K. Bhatt, Shri Chandrashekhar D. Dholakiya, Shri Rajesh M Gohel and Dr. Kamallesh D. Shah for their keen interest in my development. Only because of them I could pursue higher education in science.

My sincere gratitude to my family – my grandfather, my parents and an intelligent sister without their love and support it was not possible for me to cope up with the problems I faced on the way.

Above all, I bow my head before God almighty for blessing me with good health, a clear mind and hope, during this period for the successful completion of my research program.

Last but not the least; I am also thankful to all my well-wishers for their blessings without which this research work would not have come into existence.

Chandresh S. Dave
