

## LIST OF TABLES

TABLE NO.	PAGE
1. Findings of NCHE using Carkhuff's model of interpersonal skills.	109
2. Time line of researches in humanistic orientation training of teachers.	133
3. Table showing the design of the experiment	150
4. Paradigm of the study	153
5. The experimental design in study I & II	154
6. Distribution of the sample.	159
7. Pre-post training rating of responses of experimental teachers and rating by the group at the end of training for their humanistic interpersonal skills - Study I	192
8. Pre and post experimental ratings of responses by the teachers of control group-I for their humanistic interpersonal skills.	195
9. Pre-post-training rating of experimental teachers and rating by the group at the end of training for their humanistic interpersonal skills.	197
10. Pre and post experimental ratings of responses by the teachers of control group-II for their humanistic interpersonal skills.	199
11. Analysis of Pre-post observations of classroom interaction in experimental teachers of Study-I	201
12. Analysis of the pre-post observations of classroom interaction in experimental teachers of study-II	202
13. Mean percentages of positive and negative behaviours of experimental teachers and pupils of study I and II	203
14. Results of treatment on students' motivation for schooling - study -I	213
15. Results of treatment on students' motivation for schooling study-II	214
16. Results of treatment on students' academic self-concept-performance based-Study-I	215

17.	Results of treatment on students' academic self-concept-performance based Study-II	216
18.	Results of treatment on students' academic self-concept-reference based Study-I	218
19.	Results of treatment on students' academic self-concept-reference based study-II	219
20.	Results of treatment on students' sense of control over performance - study-I	221
21.	Results of treatment on students' sense of control over performance - study II	222
22.	Results of treatment on students' instructional mastery - Study-I	224
23.	Results of treatment on students' instructional mastery - Study-II	225
24.	Results of treatment on students' attitude towards school Study-I	227
25.	Results of treatment on students' attitude towards school Study-II	228
26.	Results of treatment on self-esteem of students Study-I	230
27.	Results of treatment on self-esteem of students Study-II	231
28.	Results of treatment on students' perception of their teachers - Study-I	233
29.	Results of treatment on students' perception of their teachers Study-II	234
30.	Results of treatment on sociometric status of students' - Study I	236
31.	Results of treatment on sociometric status of students' Study-II	237
32.	Comparison of gain scores between the sub-scales of school attitude measures in experimental group Study-I	246
33.	Comparison of gain scores between the sub-scales of school attitude measures in experimental group Study-II	248
34.	Correlation between pre-test and post-test scores of personal growth variables in experimental and control groups Study I	252

35.	Correlation between pre-test and post-test scores of personal growth variables in experimental and control groups Study-II	253
36.	Significance of difference between the mean gain scores of selected variables of personal growth in experimental and control groups of Study-I	256
37.	Significance of difference between the mean gain scores of selected variables of personal growth in experimental and control groups of Study-II	257
38.	't' and the meta analysed 'z' values of the selected variables of personal growth	258
39.	Results of treatment on students' sensitivity to see problems Study-I	265
40.	Results of treatment on students' sensitivity to see problems Study-II	266
41.	Results of treatment on students' ability to perceive unusual uses test - Study-I	268
42.	Results of treatment on students' ability to percieve unusual uses test-Study-II	269
43.	Results of treatment on students' ability to perceive consequences-Study-I	271
44.	Results of treatment on students' ability to perceive consequences Study-II	272
45.	Results of treatment on students' creative ability-study-I	274
46.	Results of treatment on students' creative ability Study-II	275
47.	Results of treatment on students' academic performance Study-I	277
48.	Results of treatment on students' academic performance Study-II	278
49.	Comparison of the gain scores of the sub-tests of creativity in experimental group Study-I	286
50.	Comparison of the gain scores of the sub-tests of creativity in experimental group Study-II	288
51.	Correlation between pre and post test scores of cognitive growth variables with respect to experimental and control groups Study-I	292

52.	Correlation between pre and post test scores of cognitive growth variables with respect to experimental and control groups - Study II	293
53.	Significance of difference between the mean gain scores of cognitive growth variables of students' in experimental and control groups of study-I	296
54.	Significance of difference between the mean gain scores of cognitive growth variables of students' in experimental and control groups of study-II	297
55.	't' and the meta-analysed 'z' values of the selected variables of cognitive growth	298
56.	Significance of difference between pre and post test profiles of the students attitude towards school, sociometric status and creativity in experimental group study-I	302
57.	Significance of difference between pre and post test profiles of the variables of students' attitude towards school, socio-metric status and creativity in experimental group Study-II	306
58.	Results showing the significance of improvement in students' motivation for schooling	313
59.	Results showing the significance of improvement in the self-concept of students both performance and reference based	316
60.	Results showing the significance of improvement in students' sense of control over performance.	318
61.	Results showing the significance of improvement in students' instructional mastery.	320
62.	Results showing the significance of improvement in student's attitude towards school.	322
63.	Results showing the significance improvement in students' self-esteem	324
64.	Results showing the significance of improvement in students' perception of their teachers.	327
65.	Results showing the significance of improvement in students sociometric status	329
66.	Results showing the significance of improvement in students' cognitive growth with respect to creative ability.	332
67.	Results showing the significance of improvement in the academic performance of students.	334
