Respected Madam,

Guntur.

I really didn't find any change in my teachers after the experiments. I had lots of expectations about the experiment but the results were not satisfactory. I never had any difficulties with any teacher's attitude towards me nor do I have any at present. My teachers understand me in all the ways. Of course they failed in certain aspects but that is common I suppose.

Your experiment can be useful only if the results are practised. May be many of my friends experienced the changes in my teachers but I personally don't see any thing (change). My aspirations were same as they were before. I always thought I would be successful and I think the same at present also. However my attitude about subjects changed but that I am sure not due to teachers except in the case of Mathematics. In 8th class I used to hate mathematics because I didn't have any interest in the subject. But in 9th I changed my view because the teaching was very satisfying and I developed confidence in myself.

Previously, I used to have liking for school, but now I lost it.

we were very much developed with the results of experiment. We saw some development in the teaching and behaviour of our teachers towards us. I observed some development in the teaching and the opinions of us towards the subjects.

The changes observed in teacher Miss. Suseel :- She was ^(is being) able to understand us. As we were not facing any problem in her teaching except in her threatening behaviour but she changed to some extent.

1) Santosh :- She was able to understand our problems. First of all we did not have any problems in her teaching or in her behaviour towards us. From first onwards. But some minute problems which does not into concentration were solved. She helped me in developing my concentration towards ~~my~~ studies.

1) Sakaswathi :- We did not have any problem in her teaching & behaviour. She was the teacher who made my Hindi subject develop.

1. Change in teachers behaviour and attitude:- I found some change in the teachers behaviour and attitude to me. Some teachers ^{have} started understanding me after the experiments, while ~~some~~ some teachers are still in the same position i.e. they are as good as before.

Kusuma teacher :- She is as usual as before ^{every} after the experiments.

She is a very kind teacher. She really has the capacity of understanding, respecting the students. After the experiments also she has the same attitude towards me.

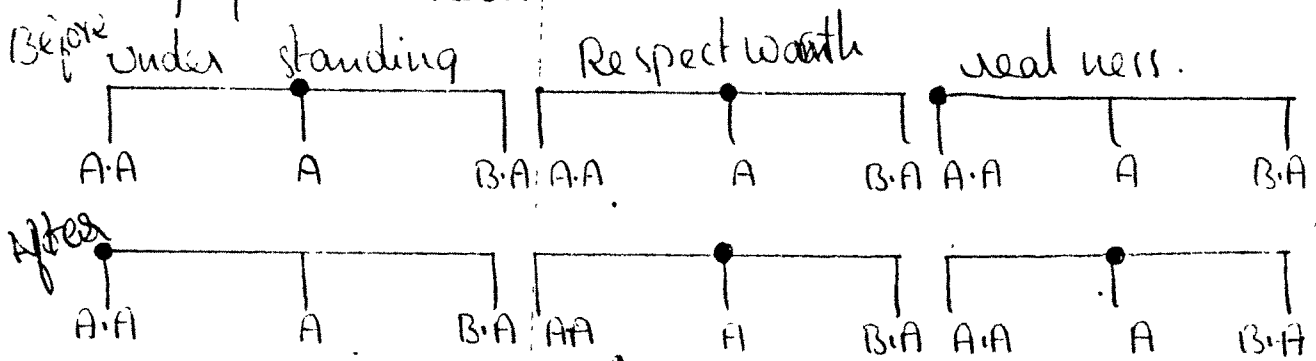

She is very friendly, warmth, affection ^{at} towards me. She points out my mistakes very softly i.e. fit for my mentality.

So this is one way of clear understanding about me. She has the realness in her feeling. She never hides anything from any student of the class.

Experiment :-

There was change in our teachers after they got trained by Sarojini Madam. This experiment satisfied me & made me attract towards school.

It benefited our teachers & us a lot. There was change in our teachers towards me. It's positive change.

Teacher's Behaviour :-

1. Susela's Teachers Behaviour :- She teaches us Natural Science.

After Experiments conducted by Madam, there was ~~no~~ ^{some} change in her towards me. In lower classes she used to punish children as they belong to lower classes. Towards me there were some change. In older days she used to punish me, but now she stopped punishing me. But in teaching she is always the same.

This experiment gave up a good benefit. After this experiment we saw a good change in our teachers attitude ~~too~~ towards children. They seem to be friendly with the students and showed some interest towards the students. Because of this experiment the students in the class also moved friendly and also the students who were having some afraid towards the teachers moved freely. Because of this experiment I did not want to miss the classes and attend the classes regularly in order not to miss the lessons of the teachers. I am a dull student in the class and my ~~child~~ teacher (not all the teachers) encouraged me to read well and study well and she also told me the methods how to read and get marks at least ~~the~~ 20 or 25 marks for 50. The atmosphere in the class was better than before this experiment: changes in the teachers:-
Our Science teacher (Suceela) is a good teacher before itself, but she is some

Experiment -:

After the experiment there are some changes in our class. There is security to class. Friendliness has developed. Change in teachers is observed. There is some change in teachers understanding. After experiment our interest towards all the subjects and level of understanding towards some students subjects. Thus after the experiment there is a lot of change in our class.

Teachers -:

The level of understanding, warmth etc of teachers towards all has increased to a considerable extent.

1) Suseela Teacher -:

The level of understanding was at first at Above ~~speech~~ after experiment her level of understanding. This can be noticed by me when I asked her to change my place. Before experiment, she did not allow me to sit in front benches though I urged her. But later she understood my eye trouble and allowed in sit in front bench. The warmth of the teacher

H. srulatha

will not read that (much) subject she shows love and affection towards us.

Maths Sir :- Our Sir teaches maths very (much) well. & He clears our doubt and say in understanding method which we are able to follow. & He been serious in period and makes us funny in the other matters.

English teacher :- She teaches us English very much. For a single line she teaches with examples that we are able to follow her. And she feels sad when she felt that we are unable to know follow her. She works hard in order to explain us clearly. She also teaches us Social. which she is newly came to tell us only social. As she is new she ~~feel~~ feels that the students were ~~fe~~ able to understand or not. She works hard to ~~teach~~ teach us well in all the matters in which we have a doubt. She too is in a friendly way to us.

Physics teacher :- She is ^{not new} ~~new~~ to our school, she teaches us very well. but ~~her~~ as her voice is low the people who are in the back were unable to follow her or hear her. She explains us so clearly and clears our doubts in very simple way.

Date :- 28.2.88.

This experiment had helped us very much in friendly relations between one and another. It also helped to develop friendly relationships between the teachers and students. They have full confidence and strong belief in students.

This experiment brought many changes in students. When this experiment was not conducted the students were average and were above average after this experiment. I developed a sort of love and affection between teachers and students. They were very high in understanding our problems and by solving our problems. There was also change in the behaviour.

Our teachers were very polite to students. They had a sort of love and affection towards people by telling them good words and change them completely. Our teachers take more performance to the people who are backward in their studies. And they will understand our problems and solve them. I was able to follow all the teachers in explaining their lessons. Our teachers will teach the lesson very nicely. And so that we want to listen that subject.

S Rama Krishna Reddy
IX class

Experiment :-

Due to the experiment there were many changes in the teaching of lessons. All of them changed their ways of teaching in the class and they were clarifying our doubts. Thus the experiment changed the views of the teacher.

Climate of the class - The climate of the class was pleasant and it is good.

Changes in the teachers :- All the teachers changed their way of teaching and they are close to the students. They are understanding the views of the children. They are clarifying each and every doubt and they are behaving with the understanding of the students. They are teaching to which extent the students are understanding. Due to this experiment there is change in the way of teaching.

Teachers name :-

Saraswati Teacher :- Teacher teaches Hindi. Teacher has increased the average of tellings the lessons. She is concerned with each and every doubt and she clarifies the doubt. She got the power to understand the student and in method of telling the lesson.

Sushela Teacher - Teacher teaches natural science. Teacher has increased the average of telling the lesson from the time of the experiment.

1. About the Experiment :- The experiment that is conducted by you, to an extent, satisfied me, because at first I was unable to ^{understand} teacher's opinions and their understanding towards me. But I understand that, recently I had felt that some of the teachers were acting according to our opinions and understandings by understanding me.

2. Teacher's behaviour :-

1. Suseetha Teacher :- She, now understands me to an extent.
2. Saraswathi Teacher :- She, understands me to an extent.
3. Sunilosh Teacher :- She understands me to a great extent.
4. Brahmani Teacher :- She does not bother about me.
5. Kotewara Rao Master :- He understands me some times.
6. Andhira Teacher :- She understands me some times.

3. Highest change :- In my opinion, I think that ~~our~~ ^{our} English teacher got the highest change.

4. Attitude towards Subject :- My attitude towards English is very high. I like English explanation ~~that is~~ giving by our English teacher (Suntosh teacher).

5. Climate of the class environment :- I feel freely in only three subject classes: (i) English, Social, Math. Our Social teacher is also English teacher, and a English teacher.

badly. I will like that much that I cannot
express

Brahmar teacher:- she was our Telugu Teacher. She is a very Partiality teacher. ^{at} she will give marks only to the children she liked. ~~if~~ they wrote wrong also she will give marks I think. There will be no good atmosphere in her class. She will not teach nicely. She will teach but she will not that much nicely.

M. PADMA SUSEELA.

IX CLASS.

The experiment which was conducted is very appreciate. I was very much fascinated by it. I liked this experiment very much. I invite such type of experiments. Teachers who teach their children nicely should attend this type of experiment. I think that this experiment has brought change in our teachers. I think this experiment has increased my self-esteem, self-confidence and self-capacity. I like such type of experiments very much and invite them. This experiment has brought peaceful atmosphere in our classroom. ~~I think~~ In my teachers behaviour also there was a lot of change after this experiment. Before the experiment: Before the experiment the teachers are very strict. ~~A~~ there was no peaceful atmosphere in the classroom. There was strictness in the classroom. The children ~~would~~ would be very afraid. There was no link between teachers and students. They used to frighten the people very much. After the experiment: There was a very change after the experiment in teachers. There was a peaceful atmosphere in the classroom. There was a link between the teachers and students. Teachers are talking somewhat freely in the classroom. The strictness was ~~some~~ reduced. They are

The class

This experiment had helped us to develop a friendly relationship between the students and teachers. We were able to develop self confidence and have a strong determination towards our aspiration. We were able to put out our ideas regarding our teachers.

After this experiment we observed some change in the teachers. All the teachers were in a friendly relation towards the students. A sort of friendly atmosphere was established in the class room. The fear of the students towards the teachers was reduced to some extent.

English Teacher: Our English teacher is always in a friendly relation with us even before the experiment. She was above average in understanding our problems during the experiment and she is very high.

Social Teacher: Our socio we have a sort of fear towards our social before experiment. But now we don't have. She talks to us as a friend.

M.S Teacher: We felt fear to approach her before the experiment. But she created interest in us after the experiment. We were reading the subject not with fear but with interest.

P.S Teacher: She is friendly with us always. We are easily approachable to her. She explained the lessons in some what different way after the experiment. But we can't

I. Changes in teacher's behaviour:- School.

* ~~Kusma~~ Teacher:- Before experiment all our teacher's behaviour is an average. After the experiment our teacher's

behaviour is an above average. In all our teacher's there is a change in their attitude. After NOW-a-days

we are not ~~fear~~ having any fear towards the teachers we are able to move freely in our class room.

NOW-a-days teacher's are understanding our problems and we are also moving freely with them. There is an increase in respecting students. There is realness.

NOW-a-days there are ~~loose~~ loving students very much.

~~Vijaya Mohan~~ ^{Teacher} Teacher:- Before After experiment
Experiment She is a
She is in ~~not~~
average

Vijaya Monahal:- She is in average She will understand students problems very

People, teachers, family feel about my ability and performance to succeed academically is above average and I want to fulfill their wishes.

Present schooling is very much related to future needs is right and it is helpful in all the needs at college level. It trained the children to take all the things in positive way.

My opinion about experiment is very good. And it helpful in the children those who are dissapointed by teachers behaviour, attitude and respect towards them. And it helps to maintain a pleasant atmosphere in classroom.

After
experiment

Dear Madam,

Ann Barbara

IX St. Joseph's School

I like schooling always. But that is
only because of my friends and my interest in
studies, but not because of teachers or the school. I
have lot of self confidence. I can do what I
want to do. I can satisfy my ~~the~~ teachers and ~~parent~~
parents in their high opinions about me. I always
like all subjects and will like them in future.
① Our experiments didn't bring about any change in
the teachers.

I have a positive feeling and liking
towards all teachers. But I expressed a slight negative
feeling about Vijaya teacher. That is only because she
② doesn't understand our problems. But ~~a~~ ~~Q~~ I like her
in all other aspects. She teaches well, she is friendly
with us and is very good. And of course, I like
her the most, of all the teachers.
