

ACKNOWLEDGEMENT

To begin with, I am highly indebted to God Almighty, Lord Ganesha-for being the dynamic power behind each and every aspect of my life and for bestowing his blessings on me in the journey called life. I pray to Him to be my strength forever.

Words cannot pay the debt of my parents Mr. Rajendra K. Jani and Mrs. Purnima R. Jani for their patient endeavors and continuous encouragement due to which I have reached this stage of life. I thank them for their unconditional love, support and blessings for whom, even my births will not be able to compensate.

I feel highly privileged to acknowledge my sincere thanks to my supervisor and teacher Prof. A. V. Ramachandran, Dean Faculty of science for his encouraging and continuous support as a guide and a philosopher throughout the entire period of the research investigation. His dynamic and vibrant personality, philanthropic attitude towards life, immense knowledge, and his view of 'eagles eye' towards the critical analysis of this piece of investigation has been a source of inspiration to me for achieving more miles in life. I feel very fortunate to be having academically trained under him.

I would like to thank Prof. M. V. Asnani, Head, Department of zoology for her constant support, help and encouragement and for

providing the necessary facilities to work in the department for this research investigation.

I am also very thankful to my friend and co-worker Mr. Nikhil Adi, without whose help and combined effort the beginning and completion of this work would not have been possible. As a professional colleague his style of working has always given rise to a "jealousy factor" in me, but in a positive way which made me work more committidely . As a friend he is always a true one and over the time we have shared joys and sorrows, frustrations and achievements, animals and friendship. I also thank him for helping me out with all the computer work .

I would like to acknowledge and thank Co-ordinator, DSA phase III Programme for providing me with animal house facility ,some of the kits and glassware and chemicals which were useful during the latter half of this work.

My sincere thanks goes to Dr. B .Suresh, Lecturer, Dept of Zoology , for his help extended throught the entire research tenure, for helping me in the research methodology,for his invaluable suggestions and for spending his valuable time for this work whenever required.

I would also like to thank Dr. A .P. Rawal for her support and continous encouragement .I would like to acknowledge Dr. R.V.Devker for his help in the initial phase of my research work . I am highly obliged for the timely help by Dr. Devendra Dandekar for providng me with the software for the statistical analysis .

I would like to express my heartfelt thanks towards my younger sister Nimsi for being a wonderful companion and for compensating on my behalf in doing all the duties towards my family and also helping me in making of this thesis. My family is incomplete without the mention of my "Tendril" whose sparkling eyes and speechless happiness always used to be first to welcome me at home at the end of the tiresome day. I also thank ms. Kirti Adi for helping me.

I would also like to thank my grandparents, Mr and Mrs. Bhatt and their family(Himanshu Mama, Urmi Mami, Bhargavi masi, Bina Masi, Jirtha, Malav, Shashwat, and specially Meera masi, for their continous encouragement and support. Also on this day I would like to remember my late Grandpatents Mr. and Mrs. Jani. I would like to express my feelings towards Dilipmama for all his help.

I would like to express my thanks towards the members of Sarabhai Research Centre , animal house,,Baroda for providing us with the animals house facilities in the initial half of this research work.

I would like to acknowledge Prof. M. M. Aruldas, Head, Dept of Endocrinology, ABMS Post Graduate Institute of Basic Medical Science, Taramani, Chennai for providing us the facility to work in his Dept. I am highly obliged to Prof. K. Balasubramaian for allowing us to work in his laboratory and for his guidance in execution of in vitro studies and Radio Immuno Assay and his cooperation in acquiring the assay kit. I would also like to thank the students of the Dept. Mr. Shivkumar, Mr. Rengajaran, Mr. Venkatesh, Mr. Parthasarthy, and others for there help.

I would like to express my thanks to all my teachers who have helped directly or indirectly in the various stages of my academic and research period.

I am also thankful to Dr. Bhavna, Dr. Arpita and Dr. Sapna for a very friendly atmosphere in the lab and for helping us out whenever required. I also thank Durgesh, Zala, Dhvani, Falguni, Prakash, Raktim, Rupali, Niraj, Prem for the help in time of need and also Biren and Sudip.

I also thank the non-teaching staff of the department who has been very cooperative and helpful throughout the entire phase.

Lastly but most importantly, I would like to remember my tiny little animals who were born and breed in the world called cage and whom I had to sacrifice for this piece of investigation. I would like to pray to Almighty for them.

Thanking you all once again,

Jennipher Jani
