

ACKNOWLEDGEMENTS

I wish to seize this golden opportunity to express my sincere thanks and deep appreciation to my research guide, Dr. A.V. Ramachandran, Professor of Zoology, Department of Zoology, the M.S. University of Baroda, for his kind suggestion of the problems of this thesis, and his continuous help, encouragement and constant display of expertise in the successful solution of the problems.

I am thankful to Dr. R.V. Shah, retired Professor of Zoology and Head, Department of Zoology, M.S. University of Baroda and former co-ordinator of UGC/DRS program in Developmental Physiology, for providing all requisite facilities, both in the department and under the DRS scheme, needed for the early stages of this study.

Thanks are also due to Dr. P.M. Ambadkar, Professor of Zoology and present Head, Department of Zoology, M.S. University of Baroda for providing all necessary facilities needed for the completion of this investigation.

I am immensely grateful to Dr. M.S. Swamy for getting me acquainted with the preliminary methodology of this study.

Thanks are extended to Dr. Bonny Pilo, Professor of Zoology, Department of Zoology and present Co-ordinator of the UGC/DRS program in Developmental Physiology for his kind permission for my use of the facilities.

I sincerely thank all my dear colleagues, teaching and non-teaching staff members and my numerous friends within and without the confines of the department who made significant contributions, individually and collectively, for the timely completion of this investigation.

I particularly wish to pay a special tribute to my elder brother, Engineer Michael O. Ndukuba, for his unflinching brotherly love, and financial and moral support to me throughout my educational career.

My conscience will not be satisfied if I fail to recognize and thank my dear family members and relatives at home in Nigeria for their constant prayer, good wishes, love and patience as they await the successful completion of my academic pursuit.

Signature of Student: PATRICK I. NDUKUBA
