

Expression of Gratitude:

This long venture of my PhD journey is a combined effort of many characters that played important role in one or the other step and helped me achieve my destination. This thesis would therefore be incomplete without expressing my gratitude to all of them.

I am very fortunate that I had Prof.G Nareshkumar, my research Supervisor who acted like Krishna, a sarathi without whom I could have never reached the end of this journey. He taught so many lessons not only about science but also about real life. “The best teacher is the one who never gives up being a student.” Sir, you are a real model for me who trained me to be patient in every circumstances. Apart from this you taught me to think out of the box and think not about the problems but about the solutions. You are always full with positivity and whenever we were in need we used to come to you. Thanks a ton for that. This gave me energy to keep going. Tea time was the most fruitful part as it helped us to envision the subject in depth along with enhancing our general knowledge. You acted like a captain and helped me cross the stormy ocean with ease.

I am highly grateful to Prof. Sarita Gupta (Head of the Department) for providing the basic infrastructural facilities and valuable suggestions during presentations.

I extend my heartfelt thanks to my co-guide Prof. Prakash Pillai (Dept.of Zoology) for his guidance, academic support and encouragement. I also take this opportunity to acknowledge Prof.G.Archana (Dept.of Microbiology). The variety of dishes cooked by you added colours to Lab party.

I am also highly indebted to Dr.Rasheedunnisa Begum, Dr.Laxmipriya Nampoothiri, Dr.C. RatnaPrabha, Dr.Devesh Suthar, Dr.S.R.Acharya, Dr.Jayshree Pohnerkar, Dr.Rajesh Singh, Dr.Ravi Vijayvargia for their support in course work and their valuable comments and suggestions at annual seminars which helped me a lot in improving my experiments.

I have been blessed with a great friend Ruma. Throughout this PhD journey, we were together except the weekends, so we have experienced all ups and downs

together. I would not miss this opportunity to thank you Ruma from the bottom of my heart. Without you this journey would not have been so beautiful. Thank you for being with me and tolerating my anger. I will always treasure our time together.

I was very fortunate to have wonderful seniors in the lab. I wish to acknowledge the help of all senior research students who helped me during my initial stages. Dr.Prasant, Dr.Chanchal, Dr.Kavita, Dr.Hemanta, Dr.Sonal, Dr.Praveena, Dr.Jeetendar, Dr.Maharshi are the great seniors who helped me get accustomed to the lab and made me realize in their own impressive ways that research is much more than mere experiments. Thanks are due to Dr. Praveena who explained the importance of making the most during initial phase of research and always encouraged to work for the Ph.D. degree. Dr.Sumeet, Dr.Ashish, Dr.Ujjwal my immediate seniors owe a special thanks for helping me and supporting me in understanding the subject.

Every colleague has contributed to my work in a number of ways. My special thanks are due to Riddhi and Parini who made great company. The aspiring new members Shubham, Ankita, Akash, Nikita and Yogita made a great company and I wish for the best in their future ahead.

I take this opportunity to thank department seniors Dr.Radha, Divya, Dr.Krishma, Dr.Swapnali, Dr.Rishikesh, Dr.Mrinal, Dr.Mitesh, Dr.Naresh, Dr.Mitesh, Dr.Akhilesh, Dr.Tushar, Dr.Shoaib and Dr.Tina who helped me in some or the other way during my tenure. I am thankful to my friends in the department – Nirja, Arpi Ragitha, Abhay, Mitul, Mala, Ashlesha for their pleasurable company and I wish them all the very best.

I would also like to thank Dr.Abhishek and Pradeep for HPLC experiments.

Thanks are due to the office staff including Mr.Pethe, Akshitaben, Shaileshbhai, Manishbhai and including animal house members (Rameshbhai, Vijay bhai and Narayanbhai) for their help and guidance in all the official matters. Special thanks to Bhartiben, for always helping and for delicious food.. I am thankful to Babu kaka for maintaining cleanliness in the department. Thanks to Anilbhai for keeping the lab clean and for making it wonderful environment to work.

I would like to express heartfelt thanks to the M.Sc. dissertation students Akshata, Anshika who worked with me for their contribution to the lab and making it a healthy place to work.

A journey is best measured in friends rather than miles. Shilpika, my friend this journey was made more memorable with your contribution in my professional as well as personal life.

I express my thanks to DBT for funding this research. I also thank DBT-CTEP for providing travel grant to attend Cell-Symposia held at Montreal, Quebec, Canada.

I owe a lot to my parents, my sisters and my whole family for their constant support and encouragement at every stage of my personal and academic life. My life partner, Ankit acted like a backbone supporting me constantly. Thank you so much for that. I am very much indebted to my family who supported me in every possible way to see me reach this stage. Thanks to my in-laws who made me feel comfortable with new surroundings. The list is endless. I acknowledge everyone and offer my sincere gratitude to all whom I have met during my journey, who have helped me knowingly or unknowingly.

Above all, I owe it all to Almighty God for granting me the insight, knowledge health and strength to carry out this research and enabling me to see its completion. I thank Him for helping me at every stage of my life.
