INDEX

Title	Page number
Chapter -I- Introduction	WHIST WAS A STREET
Lead	2
Routes of lead exposure	2
Biological fate of lead	4
Signs and symptoms of lead toxicity	6
Laboratory evaluation of lead toxicity	7
Treatment of lead toxicity	, 8
Health effect	10
Hematological effects	10
Effects on nervous system	12
Other effects of lead	13
Cadmium	16
Routes of exposure	16
Sources of cadmium exposure	17
Biological fate of cadmium	17
Laboratory evaluation of cadmium toxicity	20
Treatment	21
Health effects	21
Effects on renal system	22
Hematological effects	23
Other health effects of cadmium	23
Reproductive system	24
Structure of ovary	26
Structure of Uterus	29
Reproductive cycle	29
Ovarian changes during estrus cycle	35
Uterine changes during estrus cycle	38
Neuroendocrine control of estrus cycle	39

Gonadotropins	41
Biogenesis of steroid hormones	48
Gonadotropin and peptide transmitters	•
as possible regulators of steroidogenesis	63
Regulation of gonadal function by growth factors	64
Transport of ovarian steroid hormones in plasma	68
Targets and mechanism of action of steroid hormones	69
Major function of ovarian steroids	70
Structure of placenta	73
Transport systems in placenta	77
Placental steroidogenesis	80
Biosynthesis of estrogen during pregnancy	80
Biosynthesis of progesterone during pregnancy	84
Reproductive toxicity	85
Reproductive and developmental effects	
of lead and cadmium	86
Male reproductive system	86
Female reproductive system	89
Effects of lead and cadmium	
during pregnancy and development	93
Aim and objectives of the present study	99

Chapter –II

Materials and methods		
Chemicals Animals	102 102	
Methods	103	
Granulosa cell isolation	103	
3β-hydroxy steroid dehydrogenase (3β H	SD)	

adio Immuno Assay of 17 β Estradiol Progesterone 106 adio receptor assay 108	17β hydroxy steroid dehydrogenase (17β HSD)	104
dination of luteinising hormone (r-LH) rat follicle stimulating hormone (r-FSH) rat follicle stimulating hormone (r-FSH) raturation kinetics raturation kinetics raturation for LH and FSH in granulosa cells ranulosa cell membrane preparation ranulosa cells	Radio Immuno Assay of 17 β Estradiol	^
dination of luteinising hormone (r-LH) rat follicle stimulating hormone (r-FSH) raturation kinetics raturation kinetics raturation of LH and FSH in granulosa cells raturation in fraction preparation ranulosa cell membrane preparation ranulosa cells ranulosacels	/ Progesterone	106
rat follicle stimulating hormone (r-FSH) aturation kinetics inding of LH and FSH in granulosa cells letallothionein fraction preparation lacental membrane	Radio receptor assay	108
aturation kinetics 109 inding of LH and FSH in granulosa cells 110 idetallothionein fraction preparation 111 ranulosa cell membrane preparation 112 lacental membrane preparation 113 idembrane fluidity 113 ia*K*ATPase 114 iorganic phosphorus 116 chiffs base 117 iorganic peroxides 117 idetal analysis 119 ieduced glutathione 121 ipid peroxidation levels 122 iuperoxide dismutase 124 chatalase (CAT) 126 cholesterol estimation 128 iorganic phospholipids 129 idycogen content 130 iostimation of DNA 131 iostimation of RNA 132 iotal lipids 133 iotal lipids 133 iotal lipids 134 iotal lipids 135 iotal phosphatase 135	Iodination of luteinising hormone (r-LH)	*
inding of LH and FSH in granulosa cells Italian fraction preparation Italian ranulosa cell membrane preparat	rat follicle stimulating hormone (r-FSH)	108
Idetallothionein fraction preparation In ranulosa cell membrane preparation In ranulosa cell membrane preparation In the properties of the	Saturation kinetics	109
ranulosa cell membrane preparation lacental membrane preparat	Binding of LH and FSH in granulosa cells	110
lacental membrane preparation Itembrane fluidity Italian a the tembrane fluidity Italian a tembrane fluidity Italian	Metallothionein fraction preparation	111
