

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
4.1	Details of fingerprint chromatograms of green tea extract after scanning at 254 nm.	96
4.2	Effect of green tea extract on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the heart of rats in doxorubicin induced cardiotoxicity (acute study) in rats.	133
4.3	Effect of melatonin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the heart of rats in doxorubicin induced cardiotoxicity (acute study) in rats.	134
4.4	Effect of lovastatin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the heart of rats in doxorubicin induced cardiotoxicity (acute study) in rats.	135
4.5	Effect of green tea extract on membrane bound enzymes in the heart of rats in doxorubicin induced cardiotoxicity (acute study) in rats.	138
4.6	Effect of melatonin on membrane bound enzymes in the heart of rats in doxorubicin induced cardiotoxicity (acute study) in rats.	139
4.7	Effect of lovastatin on membrane bound enzymes in the heart of rats in doxorubicin induced cardiotoxicity (acute study) in rats.	140
4.8	Effect of green tea extract on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the heart of rats in doxorubicin induced cardiotoxicity (chronic study) in rats.	165
4.9	Effect of melatonin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the heart of rats in doxorubicin induced cardiotoxicity (chronic study) in rats.	166

4.10	Effect of lovastatin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the heart of rats in doxorubicin induced cardiotoxicity (chronic study) in rats.	167
4.11	Effect of green tea extract on membrane bound enzymes in the heart of rats in doxorubicin induced cardiotoxicity (chronic study) in rats.	170
4.12	Effect of melatonin on membrane bound enzymes in the heart of rats in doxorubicin induced cardiotoxicity (chronic study) in rats.	171
4.13	Effect of lovastatin on membrane bound enzymes in the heart of rats in doxorubicin induced cardiotoxicity (chronic study) in rats.	172
4.14	Effect of green tea extract on the levels of lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the kidney of rats in cisplatin induced nephrotoxicity (acute study).	216
4.15	Effect of melatonin on the levels of lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the kidney of rats in cisplatin induced nephrotoxicity (acute study).	217
4.16	Effect of lovastatin on the levels of lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the kidney of rats in cisplatin induced nephrotoxicity (acute study).	218
4.17	Effect of green tea extract on membrane bound enzymes in the kidney of rats in cisplatin induced nephrotoxicity (acute study).	221
4.18	Effect of melatonin on membrane bound enzymes in the kidney of rats in cisplatin induced nephrotoxicity (acute study).	222
4.19	Effect of lovastatin on membrane bound enzymes in the kidney of rats in cisplatin induced nephrotoxicity (acute study).	223

4.20	Effect of green tea extract on the levels of lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the kidney of rats in cisplatin induced nephrotoxicity (chronic study).	237
4.21	Effect of melatonin on the levels of lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the kidney of rats in cisplatin induced nephrotoxicity (chronic study).	238
4.22	Effect of lovastatin on the levels of lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the kidney of rats in cisplatin induced nephrotoxicity (chronic study).	239
4.23	Effect of green tea extract on membrane bound enzymes in the kidney of rats in cisplatin induced nephrotoxicity (chronic study).	242
4.24	Effect of melatonin on membrane bound enzymes in the kidney of rats in cisplatin induced nephrotoxicity (chronic study).	243
4.25	Effect of lovastatin on membrane bound enzymes in the kidney of rats in cisplatin induced nephrotoxicity (chronic study).	244
4.26	Effect of green tea extract on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in doxorubicin induced testicular toxicity (acute study) in rats.	259
4.27	Effect of melatonin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in doxorubicin induced testicular toxicity (acute study) in rats.	260
4.28	Effect of lovastatin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in doxorubicin induced testicular toxicity (acute study) in rats.	261
4.29	Effect of green tea extract on membrane bound enzymes in the testes of rats in doxorubicin induced testicular toxicity (acute study) in rats.	263

4.30	Effect of melatonin on membrane bound enzymes in the testes of rats in doxorubicin induced testicular toxicity (acute study) in rats.	264
4.31	Effect of lovastatin on membrane bound enzymes in the testes of rats in doxorubicin induced testicular toxicity (acute study) in rats.	265
4.32	Effect of green tea extract on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in doxorubicin induced testicular toxicity (chronic study) in rats.	281
4.33	Effect of melatonin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in doxorubicin induced testicular toxicity (chronic study) in rats.	282
4.34	Effect of lovastatin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in doxorubicin induced testicular toxicity (chronic study) in rats.	283
4.35	Effect of green tea extract on membrane bound enzymes in the testes of rats in doxorubicin induced testicular toxicity (chronic study) in rats.	286
4.36	Effect of melatonin on membrane bound enzymes in the testes of rats in doxorubicin induced testicular toxicity (chronic study) in rats.	287
4.37	Effect of lovastatin on membrane bound enzymes in the testes of rats in doxorubicin induced testicular toxicity (chronic study) in rats.	288
4.38	Effect of green tea extract on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in cisplatin induced testicular toxicity (acute study) in rats.	303
4.39	Effect of melatonin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in cisplatin induced testicular toxicity (acute study) in rats.	304

4.40	Effect of lovastatin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in cisplatin induced testicular toxicity (acute study) in rats.	305
4.41	Effect of green tea extract on membrane bound enzymes in the testes of rats in cisplatin induced testicular toxicity (acute study) in rats.	308
4.42	Effect of melatonin on membrane bound enzymes in the testes of rats in cisplatin induced testicular toxicity (acute study) in rats	309
4.43	Effect of lovastatin on membrane bound enzymes in the testes of rats in cisplatin induced testicular toxicity (acute study) in rats	310
4.44	Effect of green tea extract on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in cisplatin induced testicular toxicity (chronic study) in rats.	326
4.45	Effect of melatonin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in cisplatin induced testicular toxicity (chronic study) in rats.	327
4.46	Effect of lovastatin on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the testes of rats in cisplatin induced testicular toxicity (chronic study) in rats.	328
4.47	Effect of green tea extract on membrane bound enzymes in the testes of rats in cisplatin induced testicular toxicity (chronic study) in rats.	331
4.48	Effect of melatonin on membrane bound enzymes in the testes of rats in cisplatin induced testicular toxicity (chronic study) in rats	332
4.49	Effect of lovastatin on membrane bound enzymes in the testes of rats in cisplatin induced testicular toxicity (chronic study) in rats	333
4.50	Effect of resveratrol on lipid peroxidation (MDA content), endogenous antioxidant enzymes (superoxide dismutase and catalase) and reduced glutathione in the heart of rats in DMBA induced mammary cancer in rats.	344
