

LIST OF TABLES

Table	Page
3.1	Description of the Control Group 63
3.2	Description of the Experimental Group .. 64
4.1	Summary of ANCOVA for Attitude towards Gender Equality taking Treatment as a Source of Variance 95
4.2	Testwise Mean, SE and 't' Value of Attitude towards Gender Equality in the Control Group and the Experimental Group 96
4.3	Summary of ANCOVA for Gender-Stereotyping taking Treatment as a Source of Variance 97
4.4	Testwise Mean, SE and 't' Value of Gender-Stereotyping (vis-a-vis Professions) in the Control Group and the Experimental Group 98
4.5	Testwise Mean, SE and 't' Value of Gender-Stereotyping in the Experimental Group With Respect to Professions Labeled as 'Appropriate Only for Women' 100
4.6	Testwise Mean, SE and 't' Value of Gender-Stereotyping in the Experimental Group With Respect to Professions Labeled as 'Appropriate Only for Men' .. 100
4.7	Professions Considered Appropriate for Both, Men and Women 104
4.8	Professions Considered Appropriate for Both Genders but with a Slight Inclination towards Women.. .. . 104
4.9	Professions Considered Appropriate for Both Genders but with a Slight Inclination towards Men 105

List of Tables

Table	Page
4.10 Professions Considered More Appropriate for Women	107
4.11 Professions Considered More Appropriate for Men	108
4.12 Professions Considered Predominantly Feminine	109
4.13 Professions Considered Predominantly Masculine	111
4.14 Reasons Given for the Professions Considered More Appropriate for Women (in percentages of respondents)	116
4.15 Reasons Given for the Professions Considered Predominantly Feminine (in percentages of respondents)	117
4.16 Reasons Given for the Professions Considered More Appropriate for Men (in percentages of respondents)	118
4.17 Reasons Given for the Professions Considered Predominantly Masculine (in percentages of respondents)	119
4.18 Difference in Frequency of Reason Categories Before and After Treatments ..	120
4.19 Summary of ANCOVA for Value Judgement taking Treatment as a Source of Variance	123
4.20 Testwise Mean, SE and t-Value of Value Judgement in the Control Group and in the Experimental Group	124
4.21 Testwise Mean, SE and t-Value of Value Judgement for Situations on Which Value Discussion Model was Found Effective	126
4.22 Testwise Mean, SE and t-Value of Value Judgement for Situations on Which Value Discussion Model Had No Significant Effect	127

List of Tables

Table	Page
4.23 Summary of ANCOVA for Attitude towards Gender-Equality taking Sex as Source of Variance 	180
4.24 Summary of ANCOVA for Gender-Stereotyping taking Sex as Source of Variance 	181
4.25 Summary of ANCOVA for Value Judgement taking Sex as Source of Variance 	182
4.26 Summary of ANCOVA for Attitude towards Gender-Equality taking Mother's Profession as a Source of Variance 	183
4.27 Summary of ANCOVA for Gender-Stereotyping taking Mother's Profession as a Source of Variance 	184
4.28 Summary of ANCOVA for Value-Judgement taking Mother's Profession as a Source of Variance 	185
4.29 Summary of ANCOVA for Attitude towards Gender Equality taking Father's Profession as a Source of Variance 	186
4.30 Summary of ANCOVA for Gender-Stereotyping taking Father's Profession as a Source of Variance 	187
4.31 Summary of ANCOVA for Value Judgement taking Father's Profession as a Source of Variance 	188
4.32 Summary of ANCOVA for Attitude towards Gender-Equality taking Mother's Education as a Source of Variance 	189
4.33 Summary of ANCOVA for Gender-Stereotyping taking Mother's Education as a Source of Variance 	190
4.34 Summary of ANCOVA for Value Judgement taking Mother's Education as a Source of Variance 	191
