

### List of Tables

<u>Table No.</u>	<u>Title</u>	<u>Page No</u>
1.1	Reports describing the adrenocortical stress response in neonatal rats.	7
1.2	Examples of local or <i>in vitro</i> steroid effects on cell surface events and properties.	17
1.3	Effect of Adrenalectomy and Hormone Replacement on Behaviour.	37
1.4	Reports on the effects of corticosterone on neurotransmitter metabolism in adult rat brain.	41
1.5	Reports on the effect of glucocorticoid on brain glial cells.	45
1.6	Some reports on the effect of glucocorticoid on cAMP second messenger system.	49
2.1	List of reported with dose glucocorticoid used, duration and parameters measured in rats.	64
2.2	Some studies of adrenalectomy with different duration and brain parameters studied.	66
3.1	Effect of Corticosterone administration on body weight, brain weight, liver weight and thymus weight in at different ages in rats.	91
3.2	Effect of Corticosterone, Dexamethasone and ACTH on body weight and brain weight of 20 day old rat.	92
3.3	Effect of Adrenalectomy and Cort. replacement on body weight and brain weight of rat after ADX.	93
3.4	Effect of Adrenalectomy and Cort. replacement on body weight, brain weight, liver weight and plasma Na <sup>+</sup> concentration of rat after ADX.	94
3.5	Effect of Corticosterone administration on weights of different brain regions at 10 and 20 days of age rat brain region weight.	96
3.6	Effect of Adrenalectomy & Cort. replacement on weights of different brain regions after ADX at 40 days of age.	96

3.7	Concentration of phospholipids in developing rat brain.	102
3.8	Effect of Corticosterone administration on the concentration of phosphoinositides in rat brain.	103
3.9	Effect of Corticosterone administration on the <sup>32</sup> P incorporation <i>in vivo</i> into phosphoinositides in rat brain.	103
3.10	Effect of Chronic corticosterone treatment on the concentration of phospholipids in rat brain.	105
3.11	Effect of Corticosterone administration on the <sup>32</sup> P incorporation <i>in vivo</i> into phospholipids in rat brain.	106
3.12	Effect of Corticosterone, Dexamethasone, ACTH and Testosterone on the concentration of phospholipids in 20 day old rat brain.	108
3.13	Effect of Corticosterone, Dexamethasone, ACTH and Testosterone on the <sup>32</sup> P incorporation of phospholipids in 20 day old rat brain.	110
3.14	Effect of Adrenalectomy and Cort. replacement on concentration of phosphoinositides in rat brain after ADX	112
3.15	Effect of Adrenalectomy and Cort. replacement on <sup>32</sup> P incorporation <i>in vivo</i> into phosphoinositides in rat brain after ADX.	112
3.16	Effect of ADX and Cort. replacement on concentration of phospholipids & cholesterol in rat brain after ADX.	113
3.17	Effect of Adrenalectomy and Cort. replacement on <sup>32</sup> P incorporation <i>in vivo</i> into phospholipids in rat brain after ADX.	113
3.18	Effects of Corticosterone administration on cholesterol and galactolipid concentration in 10 day old rat brain regions.	117
3.19	Effects of Corticosterone administration on individual phospholipids concentration in 10 day old rat brain regions.	118
3.20	Effects of Corticosterone administration on cholesterol and galactolipid concentration in 20 day old rat brain regions.	120

3.34	Effect of Corticosterone administration on Na+K+ATPase and 5'Nucleotidase in rat brain region subcellular fractions.	169
3.35	Effect of Adrenalectomy and Cort. replacement on membrane bound enzymes in rat brain region membrane.	171
3.36	Activities of membranes bound enzymes in developing rat brain region membranes.	174
3.37	Effect of Adrenalectomy (5 months) on membrane bound enzymes in 22 months old rat brain region membrane.	177
3.38	Comparison of anisotropy and microviscosity of the biomembranes.	188
3.39	Effect of Corticosterone in anisotropy and microviscosity of synaptomal plasma membranes from cerebral cortex in day 20 rat.	188
3.40	Cross sectional diameter of cells in hippocampal areas.	206
