

List of Figures

Figure No.	Title	Page No.
1.1	Picture of Castor Beans	3
1.2	Crystal structure of Flt3receptor interacting lectin from seeds of <i>Dolichos lablab</i>	6
1.3	Crystal structure of Wheat Germ Agglutinin (WGA) in complex with N-Acetyl-D-glucosamine	8
1.4	Crystal structure of mannanose specific bulb lectins from <i>Scilla campanulata</i> (Blue bell)	10
1.5	Crystal structure of Jacalin related lectin complex with Methyl- α -mannose from <i>Musa acuminata</i> (Banana)	11
1.6	Crystal structure of <i>Viscum album</i> mistletoe lectin	13
2.1	Two-step purification scheme for PotHg	39
2.2	Fetuin-sepharose 4B chromatography profile	39
2.3	DEAE Ion-exchange chromatography profile	40
2.4	Molecular weight analysis of PotHg	42
2.5	Effect of pH and temperature on hemagglutination activity of PotHg	45
2.6	Protease inhibition assay of PotHg	46
2.7	Tryptophan modification of PotHg by NBS	47
2.8	Effect of tryptophan modification on hemagglutination activity of PotHg	47
2.9	Conserved domain analysis of PotHg	49
2.10	Multiple sequence analysis of PotHg	50
2.11	The phylogenetic analysis of the Kunitz-type protease inhibitors	51
2.12	Homology model of PotHg	52
2.13	Superposition of PotHg with homolog structures	53
3.1	Fluorescence spectra of PotHg in the absence and presence of galactose	68
3.2	Fluorescence spectra of PotHg in the absence and presence of mannose	69
3.3	Stern-Volmer plots of fluorescence quenching of PotHg	72
3.4	Modified Stern-Volmer plots of fluorescence quenching of PotHg	73
3.5	Circular Dichroism (CD) spectra of PotHg in absence and presence of galactose	75
3.6	Diffraction images of PotHg crystals	78
3.7	Analysis of surface exposed tryptophan in PotHg	80
3.8	Molecular docking studies of PotHg with mannose and galactose	81
4.1	DNA and protein sequence of BGAF	97
4.2	Agarose gel profile of BGAF clone	98
4.3	SDS-PAGE analysis of protein expression trials of BGAF	99
4.4	SDS-PAGE analysis of purification process of BGAF	101
4.5	MALDI-TOF analysis for identification of BGAF	102
4.6	Effect of pH and temperature on hemagglutination activity of BGAF	104
4.7	Fluorescence spectra of BGAF in the absence and presence of GalNac	105
4.8	Fluorescence spectra of BGAF in the absence and presence of Methyl- α -D-mannopyranoside	106
4.9	Circular Dichroism (CD) spectra of BGAF in absence and presence of GalNac	108
4.10	Antimicrobial activity of BGAF	111

4.11	Multiple sequence alignment (MSA) of BGAF	114
4.12	Phylogenetic analysis of BGAF	115
4.13	Homology modelling of BGAF	116
4.14	Secondary structure prediction of BGAF	117
4.15	Molecular docking studies of BGAF with GalNac	119
5.1	Agarose gel profile of BGAF_Lec clone	124
5.2	DNA and protein sequence of BGAF_Lec	136
5.3	SDS-PAGE analysis of expression trials of BGAF_Lec	137
5.4	SDS-PAGE analysis of purification process of BGAF_Lec	139
5.5	Effect of pH and temperature on hemagglutination activity of BGAF_Lec	140
5.6	Fluorescence spectra of BGAF_Lec in the absence and presence of GalNac	142
5.7	Fluorescence spectra of BGAF_Lec in the absence and presence of Methyl- α -D-glucopyranoside	143
5.8	Circular dichroism spectra of BGAF_Lec in absence and presence of D-Fructose	145
5.9	Antimicrobial activity of BGAF_Lec	147
5.10	Multiple sequence analysis of BGAF_Lec	152
5.11	Phylogenetic analysis of BGAF_Lec	153
5.12	Homology modelling and secondary structure prediction of BGAF_Lec	155
5.13	Molecular docking studies of BGAF_Lec with GalNac	158
5.14	Analysis of surface exposed hydrophobic residues	162
5.15	Superposition of loop regions of BGAF_Lec	164
6.1 A	Purification of Cotton lectin	175
6.1 B	SDS-PAGE analysis of CotLec	176
6.1 C	Gel-filtration analysis of CotLec	177
6.2	MS-MS analysis of CotLec	180-181
6.3 A	Effect of pH on hemagglutination activity of CotLec	182
6.3 B	Effect of temperature on hemagglutination activity of CotLec	182
6.4	Fluorescence spectra of CotLec in the absence and presence of galactose	184
6.5	Fluorescence spectra of CotLec in the absence and presence of mannose	185
6.6	Circular dichroism (CD) spectra of CotLec	187
6.7	Processing of CotLec protein sequence	190
6.8	Conserved domain analysis of CotLec	191
6.9	Multiple sequence alignment of CotLec	192
6.10	Phylogenetic analysis of CotLec	193
6.11	Homology modelling of CotLec	194
6.12	Multiple sequence alignment of CotLec with other vicilin showing putative processing site	199
