### CHAPTER 1 INTRODUCTION

1.1	Importance of Irradiation in the Field of Material Science	1
1.2	Historical Background of Polymers	3
1.3	Polymers	5
1.3.1	Classification of polymers	7
1.3.1 (A)	Classification based on thermal Processing behaviour	8
1.3.1 (B)	Classification based on Polymerization mechanism.	8
1.3.1 (C)	Classification based on Polymer structure	9
1.4	Structure and Morphology of Polymers	10
1.4.1	Crystalline Nature.	11
1.4.2	Amorphous Nature	16
1.5	Effect of Ion Beam Irradiation on Polymers	21
1.5.1	Chain-Scissioning	23
1.5.2	Cross-Linking	24
1.6	Applications of Polymers	28
1.6.1	Nuclear Applications	30
1.6.2	Space Application	31
1.6.3	Sensor Application	32
1.6.4	Medical Application	33
1.7	Swift Heavy Ion Interaction with Polymeric Materials: Fundamental Principles and Applications.	33
1.7.1	Introduction	33
1.7.2	Nuclear and Electronic Stopping	36
1.7.3	Ion Track	47
1.7.4	SPURS	52
1.7.5	LET and SPUR Distance	53

1.7.6	Electronic v/s Nuclear LET	54
1.7.7	High v/s Low LET	56
1.7.8	Ion-Beam Induced Property Changes.	57
1.7.9	Swift Heavy Ion Irradiation Studies on Polymers.	59
	(A) Nature of Ion Track	60
	(B) Radiation Grafting	61
	(C) Cluster Formation Induced by SHI in Polymers	61
1.8	Present Work.	62
	REFERENCES.	64

## Chapter 2

### Instrumentation and Techniques

2.1	Introduction	71
2.2	Pelletron Accelerator	72
2.2.1	The Injector System	75
2.2.2	Source of Negative Ions by Cesium Sputtering (SNICS).	76
2.2.3	Main Accelerator Column.	77
2.2.4	Analyzer Magnet.	79
2.2.5	Vacuum System.	80
2.2.6	The Charging System.	80
2.2.7	The Control System.	80
2.2.8	High Energy Beam Lines.	81
2.2.9	Material Science "UHV" Beam Line.	81
2.3	Characterization Techniques of Irradiated Polymers.	82
2.3.1	AC Electrical Properties.	83
	2.3.1(a) Dielectric in the Electric field.	85
	2.3.1(b) Conduction in Dielectric.	85
	2.3.1(c) Conductivity and Resistivity.	86
	2.3.1(d) Dielectric loss and Capacitance.	88
2.3.2	Fourier Transform Infra Red Spectroscopy.	91

2.3.3	Optical Microscopy	95
2.3.4	Scanning Electron Microscopy.	97
2.3.5	Vickers' Microhardness Indenter.	99
2.3.6	Instron Tensile Tester.	101
2.3.7	Thermogravimetry Analysis.	106
REFERENCES.		110

## Chapter 3

### Experimental Details.

3.1	Introduction.	112
3.2	Properties of Polymers used for study.	113
3.2.1	Polypropylene (PP).	113
3.2.2	Polyethylene Terephthalate (PET).	116
3.2.3	Polyimide (PI) / Kapton.	118
3.2.4	Polyvinyl Chloride (PVC).	120
3.2.5	Ethyl Vinyl Acetate (EVA).	122
3.3	Irradiation and Measurements	127
3.3.1	Target Preparation.	127
3.3.2	Thickness Measurement of Samples.	129
3.3.3	Li <sup>3+</sup> Ion Irradiation	130
3.3.4	Calculation of Range and Energy Loss using SRIM Code.	132
3.4	Characterization of Irradiated and Pristine Polymers.	136
3.4.1	FTIR Spectroscopy.	136
3.4.2	Resistance, Capacitance and Dielectric loss (tanδ) Measurement.	137
3.4.3	Optical and Scanning Electron Microscopy	140
3.4.4	Hardness Measurement.	140
3.4.5	Tensile Tester.	142
3.4.6	Thermogravimetric Analysis.	143
REFERENCES.		144

## Chapter 4

### Results and Discussion

4.1	Polypropylene (PP).	145
4.1.1	Structural Analysis.	147
4.1.2	Electrical Properties of Polypropylene.	149
4.1.3	Thermal Analysis of Polypropylene.	158
4.1.4	Conclusion.	160
4.2	Polyethylene Terephthalate (PET).	162
4.2.1	Structural Analysis.	165
4.2.2	Electrical Properties of Polypropylene.	166
4.2.3	Thermal Analysis of Polypropylene.	175
4.2.4	Mechanical Property of Polyethylene Terephthalate.	177
4.2.5	Conclusion.	179
4.3	Kapton (Polyimide).	180
4.3.1	Surface Morphology.	182
4.3.2	Microhardness.	186
4.3.3	Structural Analysis.	187
4.3.4	Conclusion.	189
4.4	Blended Polymer (PVC + PET).	190
4.4.1	Structural Analysis.	191
4.4.2	Electrical Properties.	193
4.4.3	Thermal Analysis of Blended (PVC + PET) Polymer.	201
4.4.4	Application of blended PVC and PET – <u>Gas Sensor</u> .	203
4.4.5	Conclusions.	209
4.5	Blended Polymer (PVC + EVA).	211
4.5.1	Mechanical Property of (Pristine) Pure and Blended Polymers.	212
4.5.2	Structural Analysis of Irradiated, Pure and Blended Polymers.	214
4.5.3	Thermal Analysis of Pristine, Pure and Blended Polymers.	215
4.5.4	Thermal Analysis of Irradiated, Pure and Blended Polymers.	219
4.5.5	Conclusions.	220
	REFERENCES.	222

## **Chapter 5**

### **Summary and Conclusion.**

5.1	Structural Modification (FTIR Analysis)	227
5.2	Electrical Properties.	229
5.3	Thermal Stability.	231
5.4	Mechanical Property.	232
5.5	Applications of polymer blends.	233
5.6	Future plan of work.	234
