

ACKNOWLEDGEMENT

For many, writing acknowledgement for such work, may be customary as a part of work but for me it is something more than a mere custom. This is so because of the nature of the problem of my study which has a long history of about 200 years and is full of computational complications. Handling a researcher with such a complicated problem successfully till the end of the work would be a difficult task for many teachers. To help the researcher to maintain his vigour and zeal in work in such a situation becomes extremely important. This all can be and has been possible only under Professor V.N.Kothari under whom this work was carried out. His razor sharp mind, vast knowledge and skillful handling of the issues involved in the problem have made this work possible to arrive at this form. Over and above this, his healing and refined nature of rare quality has in fact rescued me several times when my zeal to work itself used to be at its lowest ebb. Every time I met and discussed with him throughout the period I came out afresh with new optimism, new vigour and new enthusiasm to work. He was the perennial source of inspiration and encouragement for me. He kept inspiring and encouraging me even from the hospital bed. He always remained available to me not only at his Department Office but also at his residence till late night despite his heavy preoccupations. In such a way, I am heavily indebted to him for his skillful, genuinely scholarly, affectionate and fatherly guidance. I am filled with deep sense of gratitude for this and my heart leaps out and head bows down to him. I strongly believe that only very fortunate persons get an opportunity to work under him.

(iii)

I am also equally thankful to Professor M.M.Dadi, currently, Head, Department of Economics, M.S. University of Baroda, for his extremely useful directions to me on several occasions keeping aside his heavy Departmental responsibilities.

I am also equally indebted to Professor (Mrs) Maya Shah, Department of Economics, M.S. University of Baroda, who always cheerfully extended her scholarly and useful opinions to me whenever I was lost in wilderness.

I am also heartily thankful to Professor S.R. Hashim, then Head, Department of Economics, M.S. University of Baroda, for the concerns he showed in shaping the problem of this study in the beginning.

I would also like to extend my sincere thanks to all the faculty members of the Department of Economics and Research Scholars from whom I have benefited one way or the other during the course of my work.

My thanks are also due to the officials of the Hansa Mehta (University) Library, Baroda, for rendering their kind cooperation by way of readily supplying most of the required materials for this study.

I would be failing from my duty if I fail to thank the Government of India for providing me scholarship for this study under the Colombo Plan and also His Majesty's Government of Nepal and particularly Nepal Rastra Bank with which I am associated, for selecting me for this study. I am also grateful to the officials of the Department of Taxation, His Majesty's Government of Nepal for supplying the data required for this study.

(iv)

I thank my better half, Indira for shouldering the entire family burden during my absence from home.

Finally, I would like to thank Mr. K.A.Patel for skillfully typing this dissertation within a reasonable period of time.
