

ACKNOWLEDGEMENT

It is with profound sense of indebtedness that the author wishes to express his sincere feelings of gratitude to Dr. J.R. Pandya, Professor of Physics, Department of Physics, Faculty of Science, M.S. University of Baroda, Baroda for his inspiring and enthusiastic guidance throughout the present work.

The author is thankful to Dr. R.V. Joshi, Professor and Head, Applied Physics Department, Faculty of Technology and Engineering, M.S. University of Baroda, Baroda for providing excellent facilities in the department and for his keen interest in the work. He also expresses thanks to Shri Umakant Shah and members of the workshop, Faculty of Technology and Engineering for their help during this work.

The author thanks Dr. Y.K. Agrawal, Professor and Head, Pharmacy Department, for giving permission to use conductivity bridge in Pharmacy laboratory and Dr. V.G. Gadgil, Professor and Head, Metallurgical Engineering Department and Shri S.K. Agrawal, Reader in Metallurgy for helping him in carrying out work on Scanning Electron Microscope and Dr. C.C. Desai, Reader in Physics, Post Graduate Physics Department, Sardar Patel

University, Vallabh Vidyanagar for carr_ying out interferometric study with present investigation.

The author expresses thanks to Dr. R.T. Shah, Dr. L.J. Bhagia, Miss Minaxi Patel, Shri S.M. Patel and Shri D.R. Joshi and other colleagues for their help and cooperation throughout the present investigation.

The author is thankful to the University Grants Commission for providing Financial Assistance under the Scheme " Research Projects for College/University Teachers ".

The author is happy to thank his wife and members of family for encouragement and for their forbearance during the period of this investigation.

The author expresses appreciation to Shri Dinesh Bhavsar for neat typing of this thesis.

- A.J. SHAH
