

TABLE OF CONTENTS

SUMMARY OF THE THESIS

CHAPTER		PAGE
I	INTRODUCTION AND THE EXPERIMENTAL BACKGROUND	1 - 30
	1.1 Introduction	1
	1.2 Collision processes	2
	1.3 Experimental background	10
	1.4 Beam technique	11
	1.5 Swarm technique	20
	1.6 Recent experimental developments in electron - atom scattering measurements	26
	Figures (1.1 to 1.5)	30a,b,c
II	THEORETICAL APPROXIMATIONS AND APPROACH TO THE PRESENT WORK	31 - 70
	2.1 Introduction	31
	2.2 Basic formulas for the electron collisions with atoms	32
	2.2.1 Potential scattering	32
	2.2.2 The integral equation of potential scattering	34
	2.2.3 The Born approximation	36
	2.2.4 The eikonal approximation	38

CHAPTER		PAGE
	2.3.1 The scattering of fast electrons by atoms	42
	2.3.2 The Glauber approximation	46
	2.3.3 The eikonal Born series method (EBS)	48
	2.3.4 The Glauber Eikonal Series (GES)	50
	2.3.5 High - Energy higher order Born approximations	54
	2.3.6 Behaviour of second and third Born terms in HEA	65
	2.4 Recent theoretical developments in electron - atom scattering calculations	66
	2.5 Approach to the present investigations	69
III	SCATTERING OF ELECTRONS BY HYDROGEN ATOMS	71 - 141
	3.1 Introduction	71
	3.2.1 Elastic scattering of electrons by the ground (1s) state of hydrogen atom (ESGH)	73
	3.2.2 Comparison of present ESGH results with the other data	82
	3.3.1 Elastic scattering of electrons by the excited (2s) state of hydrogen atom (ESEH)	87

CHAPTER		PAGE
	3.3.2 Comparison of present ESEH results with the other theoretical results	96
	3.4.1 Inelastic scattering of electrons by the hydrogen atom (ISH)	100
	3.4.2 Comparison of present ISH results with the other theoretical results	103
	3.5.1 The Born exchange amplitudes for ESGH process	107
	3.5.2 Comparison of present ESGH (included higher order exchange amplitudes) with the other data	121
	Tables (3.1 to 3.9)	125-141
	Figures (3.1 to 3.7)	141a,b,c, d,e,f, g.
IV	SCATTERING OF ELECTRONS BY HELIUM ATOMS	142-199
	4.1 Introduction	142
	4.2.1 Elastic scattering of electrons by the ground (1s) state of helium atom (ESGHe)	149
	4.2.2 Comparison of present ESGHe results with the recent theoretical and experimental data	170
	4.3.1 Inelastic scattering of electrons by helium atom (ISHe)	174

CHAPTER		PAGE
	4.3.2 Comparison of present ISHe results with the other data	189
	Tables (4.1 to 4.5)	190-199
	Figures (4.1 to 4.4)	199a,b,c, d.
V	SCATTERING OF ELECTRONS BY LITHIUM ATOMS	200-231
	5.1 Introduction	200
	5.2.1 Elastic scattering of electrons by the ground (2s) state of lithium atom (ESGLi)	201
	5.2.2 Comparison of present ESGLi results with the other data	211
	5.3.1 An analytical study of higher order Born terms in the static field	214
	5.3.2 Comparison of static field results of ESGLi with the other data	221
	5.4.1 An analytical study of the elastic and inelastic scattering of electrons by lithium atoms	222
	Tables (5.1 to 5.5)	227-231
	Figures (5.1 to 5.4)	231a,b,c, d.

CHAPTER		PAGE
VI	DISCUSSIONS AND CONCLUSIONS	232-243
	APPENDIX	244-250
	REFERENCES	251-263
	PUBLICATIONS
