

## List of tables.

Table No.	Title	Page No.
1	List of engineering geological maps used for different purpose	12
2	List of laboratory tests conducted as per IAEG commission (Price 1981) on ground (rock and soil) material and discontinuities	14
3	In-situ testing of the discontinuities and rock masses as per IAEG commission (Price 1981)	15
4	In-situ instruments as per IAEG commission (Price 1981)	16
5	Rock Strength (Unconfined Compressive Strength)	20
6	Rock Quality Designation (RQD)	20
7	Weathering Grades for the Rock Mass	20
8	Discontinuity Spacing	20
9	Roughness Categories for Discontinuity Surfaces	21
10	Aperture (Opening) Of Discontinuity Surfaces	21
11	Block Size	21
12	Discontinuity Continuity	21
13	Filling Thickness	21
14	Moisture Conditions	22
15	Healing Of Fractures/ Shear/ Fault Zones	22
16	Salient features of Narmada and Karjan dams	29
17	Sardar Sarovar (Narmada) Project Power Installation	29
18	Stratigraphic succession in the lower Narmada valley of Gujarat	30
19	Shear strength parameters of weak layers	51
20	Results of in-situ stresses at underground powerhouse site	57
21	Shear friction factor values under different load conditions	62
22	Average values of shear parameters of the foundation rocks and weak zones	63
23	Rock mass classification of the foundations of blocks-L3, L5, Sp0-Sp7, R0, R1A and R1B and treatment of weathered rock seams	79
24	Example from some of the dams in India and abroad where concrete shear keys were provided for the foundation treatment	82
25	Rock mass classification of the Narmada dam river channel fault zone	86
26	Rock mass classification of the foundation rocks of dam blocks (40 to 44) traversed by fault zone	88
27	Rock mass classification of the Karjan dam river channel fault zone	92

28	Rock mass classification of the foundation of the Narmada dam block-3,15,16 and 57	94
29	Rock mass description and classification of underground powerhouse	117
30	Result of 3-D FEM and 3-DEC analysis	124
