

LIST OF TABLES

Table No.	TITLE	Page No.
Chapter 1	Review of literature and Introduction	
Table 1.1	Strategies of metabolic engineering and its typical targets	3
Table 1.2	Fermentation products of <i>E. coli</i> overexpressing <i>pyc</i> gene of <i>Rhizobium etli</i>	12
Table 1.3	Alterations in organic acid production upon <i>pyc</i> overexpression in <i>E. coli pfl</i> , <i>ldh</i> and <i>ptsG</i> triple mutant	12
Table 1.4	Aerobic succinate yield and productivity as a result of various subsequently introduced genetic modifications	15
Table 1.5	Distribution of the essential glucose catabolism genes across the partially and completely sequenced genomes of <i>Pseudomonas</i> spp.	21
Table 1.6	Distribution of enzymes acting at PEP-pyruvate-OAA node in different bacteria	27
Table 1.7	Activities of enzymes involved in interconversion of PEP-pyruvate-OAA in <i>P. citronellolis</i> cells grown on different carbon sources	34
Chapter 2	Materials and Methods	
Table 2.1	List of <i>E. coli</i> strains used in the present study	41
Table 2.2	List of <i>Pseudomonas</i> strains used in the present study	42
Table 2.3	List of plasmids used in the present study	43
Table 2.4	Recommended dozes of antibiotics used in this study	47
Table 2.5	Composition of SDS-PAGE reagents	53
Table 2.6	PCR conditions used in the present study	54
Chapter 3	Effect of constitutive heterologous overexpression of phosphoenolpyruvate carboxylase (<i>ppc</i>) gene of <i>Synechococcus elongatus</i> PCC 6301 on physiology and glucose metabolism of <i>P. fluorescens</i> ATCC 13525	
Table 3.1	Occurrence and distribution of PPC, PYC and GDH enzymes in different <i>Pseudomonas</i> species	69
Table 3.2	List of bacterial strains used	71
Table 3.3	Physiological variables and metabolic data from <i>P. fluorescens</i> 13525 <i>ppc</i> transformant grown on M9 medium with 100mM glucose	82
Table 3.4	Expression of <i>lacZ</i> from the <i>P_{trc}</i> promoter in species other than <i>E. coli</i>	85
Table 3.5	β -Galactosidase activities of vectors carrying the <i>lacZ</i> gene under different promoters in Gram-negative hosts	85
Chapter 4	Effect of Pi levels on glucose metabolism and organic acid secretion by <i>P. fluorescens</i> ATCC 13525 in the presence and absence of <i>ppc</i> gene overexpression	
Table 4.1	List of bacterial strains used	91

Table No.	TITLE	Page No.
Table 4.2	Pi level dependant change in specific growth rates of <i>Pf</i> (pAB3) and <i>Pf</i> (pAB4)	92
Table 4.3	Physiological variables and metabolic data from <i>P. fluorescens</i> 13525 <i>ppc</i> transformant grown on TrP1 medium.	95
Table 4.4	Effect of media composition on basal physiological and biochemical parameters of <i>Pf</i> (pAB4)	101
Chapter 5	Effect of constitutive heterologous overexpression of <i>E. coli</i> citrate synthase (<i>cs</i>) gene on glucose metabolism of <i>P. fluorescens</i> ATCC 13525	
Table 5.1	List of bacterial strains used	108
Table 5.2	Physiological variables and metabolic data from <i>P. fluorescens cs</i> transformants grown on M9 medium with 100mM glucose	114
Chapter 6	Effect of simultaneous overexpression of <i>ppc-cs</i> genes on glucose metabolism of <i>P. fluorescens</i> ATCC 13525	
Table 6.1	List of bacterial strains used	125
Table 6.2	Estimated copy numbers of various plasmids in <i>P. fluorescens</i> 13525	126
Table 6.3	Physiological variables and metabolic data from <i>ppc-cs</i> transformants of <i>P. fluorescens</i> 13525	129
Table 6.4	Comparison of physiological and biochemical parameters of <i>P. fluorescens</i> 13525 harboring various plasmids	133
Chapter 7	Effect of <i>ppc</i> and <i>cs</i> overexpression on the mineral phosphate solubilizing (MPS) ability of fluorescent pseudomonads	
Table 7.1	List of <i>Pseudomonas</i> strains used in this study	139
Table 7.2	Antibiotic sensitivity profile of wheat rhizospheric isolates of fluorescent pseudomonads	141
Chapter 8	Genetic, phenotypic and biochemical characterization of <i>ppc</i> genomic integrant <i>Pseudomonas</i> P4	
Table 8.1	List of bacterial strains used	151
Table 8.2	Oligonucleotides used for sequencing the ~1.1kb <i>Pseudomonas</i> P4 genomic DNA	155
Table 8.3	Summarized results of PCR based examination of <i>ppc</i> gene in plasmids derived from <i>Pseudomonas</i> P4 genome	163
Table 8.4	Effect of <i>Pseudomonas</i> P4 on the growth of mung beans (<i>Vigna radiata</i>)	170
Table 8.5	Influence of Pi levels on specific growth rates of <i>Pseudomonas</i> P4 and <i>P. fluorescens</i> 13525	171
Table 8.6	Physiological parameters of <i>Pseudomonas</i> P4 and <i>P. fluorescens</i> 13525 on TRP and M9 minimal media	174
Table 8.7	Organic acid secretion profile of <i>Pseudomonas</i> P4 and <i>P. fluorescens</i> 13525 on TRP and M9 minimal media	176
Table 8.8	Gluconic acid production and Pi released from different mineral phosphates by certain efficient MPS bacteria	179
