
CONTENTS

	Introduction	I
CHAPTER 1	Photothermal influences on tail regeneration. A seasonal evaluation.	21
	SUMMARY	61
CHAPTER 2	Time dependent effect of 5-HT in relation to prolactin secretion and <i>in loco</i> events during tail regeneration.	63
	SUMMARY	85
CHAPTER 3	Differential time dependent influence of pineal indoles on tail regeneration.	86
	SUMMARY	100
CHAPTER 4	Influence of exogenous melatonin administered at different time of the day on tail regeneration	101
	SUMMARY	120
CHAPTER 5	Time dependent influence of melatonin on tail regeneration is mediated through modulation of PRL release : Neuropharmacological evidence.	121
	SUMMARY	142

CHAPTER 6	Thyroid hormone and tail regeneration : Differential <i>in loco</i> and systemic effects and seasonal variation in responsiveness.	143
	SUMMARY	177
CHAPTER 7	Relative involvement of thyroxine and PRL during tail regeneration.	179
	SUMMARY	225
CHAPTER 8	Differential effects of EGF, TGF - β and NGF on tail regeneration in <i>H. flaviviridis</i> .	226
	SUMMARY	263
	General Considerations	264
	Bibliography	284
