

INDEX

CHAPTER – 1 INTRODUCTION

1.1	Introduction	1
1.2	Geoenvironmental characteristics	1
1.3	Need for EIA	4
1.3.1	Classification of the study area for the purpose of EIA	4
1.4	Geoenvironmental features of study area	5
1.5	Geographic limits	5
1.5.1	Physiography and drainage	6
1.6	Communication	7
1.7	Flora and fauna	7
1.8	Crops	7
1.9	History	8
1.10	Population	8
1.11	Objective and scope of work	8

CHAPTER – 2 METHODOLOGY

10 – 14

2.1	Geological studies	10
2.2	Geomorphological studies	11
2.3	Hydrogeological investigation	11
2.4	Land use and socio-economic aspects	11
2.5	Environmental impact assessment	12
2.6	Environmental management plan	12

CHAPTER – 3 ISSUES: FOSSIL FUEL USE AND MINING

15 – 18

3.1	Consumption profile of different energy resources	15
3.2	Importance of coal & lignite as energy sources	16
3.2.1	Nature of mining	17
3.2.2	Issues related to mining and use of Lignite	17

CHAPTER – 4 GEOLOGY OF THE AREA

19 – 36

4.1	Regional tectonic framework	19
4.2	Narmada-Tapi Basin	22
4.3	Lithology of study area	22

4.3.1	Bagh Formation	24
4.3.2	Deccan volcanics	24
4.3.3	Laterites	24
4.3.4	Tertiaries	27
4.3.4.1	Vagadkhol Formation	27
4.3.4.2	Dinod Formation	28
4.3.4.3	Tarkehwar Formation	29
4.3.4.4	Babaguru Formation	29
4.3.4.5	Kand Formation	31
4.3.4.6	Jhagadia Formation	31
4.3.5	Quaternaries	32
4.4	Depositional history	33
4.5	Geomorphology	35
CHAPTER – 5 DETAILS OF MINING AREA		37 – 43
5.1	Exploration history	37
5.2	Lignite & other associated minerals	37
5.3	Mineable lignite	40
5.4	Mining method	41
5.4.1	Bench configurations	41
5.4.2	Overburden dumping	41
5.5	Production of lignite	43
5.6	Hakran stream diversion	43
CHAPTER – 6 HYDROGEOLOGICAL STUDIES		44 – 63
6.1	Drainage	44
6.2	Hydrometeorology	44
6.3	Water quality	46
6.4	Ground water balance in the area	47
6.5	Hydraulic characteristics of the region	56
6.6	Ground water monitoring	57
6.7	Aquifer conditions in the study area	57
6.8	Effects of Mining	60
6.9	Acid Mine Water	60

CHAPTER – 7 ENVIRONMENTAL IMPACT ASSESSMENT	64 – 91
7.1 Air Environment	64
7.1.1 Ambient air quality monitoring station network	64
7.1.1.1 Micro-Meteorology	67
7.2 Noise environment	70
7.3 Water environment	71
7.3.1 Groundwater	72
7.3.2 Surface water	72
7.3.3 Waste water	72
7.4 Land environment	73
7.5 Biological environment	88
7.6 Socio - economic environment	88
7.6.1 Infrastructure resource base	89
7.6.2 Economy, employment and welfare	89
7.7 Summary of overall EIA for the study area	90
CHAPTER – 8 ENVIRONMENTAL MANAGEMENT PLAN	92 – 97
8.1 Status of the project	92
8.1.1 Preparation of mining site	92
8.2 Management of Air Environment	92
8.3 Management of noise	94
8.4 Management of water environment	94
8.4.1 Surface water management	94
8.4.2 Groundwater management	94
8.4.3 Waste water management	95
8.4.4 Acid mine water management	95
8.5 Waste and material management	95
8.6 Reclamation of the mined area	95
8.6.1 Procedure for reclamation	96
8.7 Biological environment management	96
8.8 Socio – economic environment management	96
8.9 Post mining environmental management	97

CHAPTER – 9 SUMMARY AND CONCLUSIONS

9.1	Geological setup	98 – 101
9.2	Air environment	98
9.3	Noise environment	98
9.4	Land environment	99
9.5	Biological environment	99
9.6	Water environment	100
9.7	Socio-economic environment	100
		101
