

LIST OF FIGURES

	Page No.
Figure 1.1: Geo-environment algorithm	2
Figure 1.2: Location Map of the study area	6
Figure 2.1: Generalized EIA and EMP flow chart	13
Figure 3.1: The history of energy sources for humans is marked by changes from wood, to coal, to oil; further sources may be natural gas, hydrogen, solar and fusion.	14
Figure 3.2: The energy consumed is provided from a variety of resources.	14
Figure 3.3: Emission of SO ₂ at global level	18
Figure 4.1: Geological map of Gujarat	20
Figure 4.2: Tectonic map of Western India	21
Figure 4.3: Structural and Tectonic map around Study area	24
Figure 4.4: Geological map of study area	25
Figure 4.5: Contour map of the area	36
Figure 5.1: Litholog of lignite and overburden at the study area near Amod block	38
Figure 5.2: Fence diagram depicting disposition of lignite seams in the study area	39
Figure 5.3: Rajpardi mine map showing dump sites and plantation details	42
Figure 6.1: Kaveri, Ratanpur, Madhumati river basins	45
Figure 6.2: Graph showing annual rainfall for 10 years	46
Figure 6.3: Hydrograph of Rajpardi location	57
Figure 6.4 Ground Water flow direction prepared from Reduce Water Level contours of Jhagaida Taluka.	59
Figure 7.1a: Various locations for air and noise monitoring considered in the 10 km radius	65
Figure 7.1b: Various sampling locations for surface water, ground water and soil considered in the 10 km radius	66
Figure 7.2: (a) Wind rose diagram for winter season (b) Wind rose diagram for summer season (c) Wind rose diagram for post monsoon season	68
