| Figure 3.1 | : | Conceptual framework for the descriptive study |
| Figure 3.2 | : | Conceptual framework for the experimental study |
| Figure 3.3 | : | Hypothetical relationship between the variables of the descriptive study. |
| Figure 3.4 | : | Hypothetical relationship between the variables of the experimental study |
| Figure 3.5 | : | Map of Himachal Pradesh |
| Figure 3.6 | : | Map of Kangra District |
| Figure 3.7 | : | Selected Blocks for the study |
| Figure 3.8 | : | Sampling Design |
| Figure 4.2 | : | Educational profile by age of the women farmers |
| Figure 4.3 | : | Family Type |
| Figure 4.4 | : | Family Size |
| Figure 4.5 | : | Family caste |

- Figure 4.6 : Area covered (output in m^2/h)
by women subjects with different
weeders
- Figure 4.7 : Increase in heart beats per metre
square of area weeded
(beats/ m^2)
- Figure 4.8 : Increase in energy expenditure
while working with different
weeders
- Figure 4.9 : Percentage reduction in grip
strength of both hands after
operation with weeders by women
subjects
