

List of Tables

Table 1. 1 Phytopathogenic quorum sensing bacteria.....	8
Table 2.1 RMA Composition.....	32
Table 2.2 M3 Agar media composition	33
Table 2.3 DE Media composition	35
Table 2.4 Bacterial isolates obtained using Acetonitrile enrichment method.....	39
Table 2.5 Bacterial isolates obtained using heat shock method.....	39
Table 2.6 Identification of selected AHL degrading bacterial isolates based on partial 16S rRNA gene sequencing	42
Table 3.1 Composition of Bushnell Haas Broth	49
Table 3.2 Result of Biochemical Tests for that <i>R. pyridinivorans</i> AI4 and <i>G. nicotianae</i> AI5a.....	57
Table 3.3 Comparison of biochemical characteristics of <i>G. nicotianae</i> AI5a lactonase with reported lactonases.....	77
Table 4.1 Composition of Murashige and Skoog (MS) Media.....	83
Table 4.2 Greenhouse experimental setup of soil inoculation of germinated potato tubers with <i>G. nicotianae</i> AI5a	86
Table 4.3 Results of co-culture assay using biosensor strain <i>C. violaceum</i> CV026..	111
Table 4.4 Percentage disease reduction (PDR).....	124
Table 4.5 Visual assessment	124
Table 5.1 List of phytochemical compounds used.....	136
Table 5.2 Sub-lethal concentrations of phytochemical compounds obtained.....	143
Table 5.3 PDR of Potato after storage (Phytochemicals)	153
Table 5.4 Visual assessment of Potato after storage (Phytochemicals).....	154
