“The important thing is to never stop questioning”

.....Albert Einstein

This journey began as a way to quench the curious being in me, who always wanted to know more about this inspiring universe and all things encompassing it. The reason and purpose behind our existence in this beautiful world have always made me make some sense out of the most endearing gift given to us i.e. ‘LIFE’. What makes us unique from all the other beings is the gift of reasoning and analysis and thereby having the power to change our reality and shape our future.

The future which is handed to our generation by great minds and scholars of our past. The present which is shaped by the sacrifices, hard work, and unsurmountable spirit of our great Scientists. It is an immense matter of pride to contribute to the ever-expanding field of scientific discoveries.
