

## LIST OF TABLES

<u>Table No.</u>		<u>Page No.</u>
1	Morphological and functional development of the fetus.	7
2	Mode of transfer of nutrients across the placenta.	17
3	Major factors affecting the placental transfer of diffusible substances.	18
4	Some factors associated with fetal growth retardation.	21
5	Reproductive performance in low and high income group women.	25
6	Demands on the mother of the newborn young in different species.	26
7	Nutritional demands of the growing fetus in relation to maternal diet, expressed in amounts per day.	28
8	Additional nutrient requirements during pregnancy as given by NRC.	30
9	Increments of body constituents in fetal body per 24 hr.	31
10	Nutrient intakes of pregnant and lactating women in comparison to non-pregnant and non-lactating women.	33
11	Data on the incidence of clinical symptoms of nutritional deficiency during pregnancy and lactation.	34
12	Iron requirements (mg/day) during pregnancy.	41
13	Number of subjects studied in low and high income groups.	61

List of Tables (Contd.)

<u>Table No.</u>		<u>Page No.</u>
14	Methods used for chemical estimations.	64
15	Reagents and standards used for various estimations.	67
16	Fetal liver iron stores in relation to gestational age and fetal weight in low and high income groups.	82
17	Fetal spleen iron stores in relation to gestational age and fetal weight in low and high income groups.	83
18	Fetal kidney iron stores in relation to gestational age and fetal weight in low and high income groups.	84
19	Fetal liver iron stores expressed as mg/kg body weight in relation to gestational age in low and high income groups.	88
20	Fetal liver iron stores in relation to gestational age and maternal hemoglobin in low and high income groups.	89
21	Fetal liver iron stores in relation to gestational age and maternal serum iron in low and high income groups.	90
22	Fetal liver iron stores in relation to gestational age and maternal serum total iron binding capacity in low and high income groups.	91
23	Fetal liver iron content as per cent of values at term in low and high income groups	93
24	Fetal liver iron stores in relation to fetal size and gestational age in low and high income groups.	94
25	Fetal spleen iron stores in relation to fetal size and gestational age in low and high income groups.	96

List of Tables (Contd.)

<u>Table No.</u>		<u>Page No.</u>
26	Fetal kidney iron stores in relation to fetal size and gestational age in low and high income groups.	: 97
27	Fetal liver iron stores in relation to maternal blood hemoglobin levels and fetal weights in low and high income groups.	: 100
28	Fetal liver iron stores in relation to maternal serum iron and gestational age in low and high income groups.	: 101
29	Fetal liver iron stores in relation to maternal serum total iron binding capacity in low and high income groups.	: 102
30	Hemoglobin and serum iron concentration in maternal and cord blood in low and high income groups.	: 106
31	Serum iron levels in maternal and cord blood in low and high income groups.	: 107
32	Hemoglobin levels in mother and cord blood in relation to gestational age in low and high income groups.	: 109
33	Serum iron levels of mother and cord in relation to gestational age in low and high income groups.	: 110
34	Serum total iron binding capacity (TIBC) of mother and cord in relation to gestational age in low and high income groups.	: 111
35	Significance of correlations (product-moment 'r') between different variables in low and high income groups.	: 113
36	Maternal and cord blood hemoglobin in relation to maternal blood hemoglobin in low and high income groups.	: 116

List of Tables (Contd.)

<u>Table NO.</u>		<u>Page No.</u>
37	Maternal and cord serum iron levels in relation to gestational age and maternal serum iron in low and high income groups.	: 117
38	Maternal and cord serum total iron binding capacity in relation to gestational age and maternal serum total iron binding capacity in low and high income groups.	: 118
39	Fetal magnesium stores in relation to body weight.	: 125
40	Tissue magnesium concentrations at different gestational ages in low income group fetuses.	: 127
41	Changes in chemical composition during development.	: 130
42	Tissue magnesium concentrations in relation to growth status and gestational age in low income group fetuses.	: 132
43	Tissue magnesium concentrations in relation to maternal serum magnesium levels during early pregnancy ( $\leq$ 20 weeks).	: 138
44	Cord and maternal serum magnesium (mg/dl) levels in relation to gestational age in low and high income groups.	: 139
45	Cord serum magnesium levels in relation to maternal serum magnesium levels in low and high income groups.	: 142
46	Nutritive value of the diets consumed in Trivandrum and Baroda in high and low income groups.	: 144
47	Summary of studies on the impact of maternal nutrition interventions during pregnancy on infant and child health.	: 148

# List of Tables (Contd.)

<u>Table No.</u>		<u>Page No.</u>
48	Typical meal pattern of the pregnant women : in Nava Yard.	151
49	Calorie intake at home of control and : supplemented group at different stages of pregnancy.	153
50	Cross-sectional data on weight, height, age : and parity of control and supplemented groups at different stages of pregnancy.	154
51	Incidence of clinical symptoms in control : and supplemented groups at different stages of gestation (cross-sectional).	155
52	Weight gain during pregnancy in supplemented: and control groups (longitudinal).	156
53	Birth weight in relation to pregnancy : weight gain at different stages of gesta- tion in supplemented and control groups.	158
54	Frequency distribution of weight gain : during pregnancy (cross-sectional).	161
55	Severity of nausea and vomiting Vs : pregnancy weight gain and birth weight.	162
56	Weight gain Vs birth weight at different : stages of gestation in control and supple- mented groups combined.	165
57	Weight gain Vs birth weight at different : stages of gestation in control and supple- mented groups combined in relation to the sex of the infant.	166
58	The response to food supplementation : during pregnancy in relation to the sex of the progeny.	167
59	Infant birth weight in relation to gesta- : tional age.	169

List of Tables (Contd.)

<u>Table No.</u>		<u>Page No.</u>
60	Distribution of birth weights in relation to gestational age and sex.	170
61	Variations in gestational age at birth.	173
62	Postnatal growth pattern in supplemented and control infants.	175
63	Weight gain of infants in relation to birth weight.	176
64	Perinatal practices	181
	(a) Interval between birth and first breast feed.	
	(b) Place of delivery	
	(c) Duration of labour pain	
	(d) Duration of post-partum ammenorrhea	
65	Fetal and tissue weights in relation to gestational age in low and high income groups.	188
66	Fetal and tissue weights in low and high income groups as per cent values at 32 weeks.	193
67	Fetal and tissue weight in relation to fetal weight in growth retarded and growth-normal fetus.	196
68	Human fetal weight and somatic measurements at different stages of gestation.	202
69	Frequency distribution of fetal weights as per cent expected weight for gestational age.	207
70	Fetal weight and somatic measurements in relation to growth status and gestational age in low and high income groups.	209

List of Tables (Contd.)

<u>Table No.</u>		<u>Page No.</u>
71	Ratios for different somatic measurements in fetuses in low and high income groups.	: 211
72	Somatic measurements of newborn infants in relation to gestational age in low and high income groups.	: 213
73	Somatic measurements of premature infants in low and high income groups according to birth weight.	: 223
74	Somatic measurements of full term infants in low and high income groups according to birth weight.	: 226
75	Somatic measurements of premature and full term infants in low and high income groups.	: 229
76	Low birth weight infants as per cent of appropriate for gestational age infants in low income group.	: 231
77	Ratios for different somatic measurements in premature and full term infants in low and high income groups.	: 236
