CHAPTER - 1	INTRODUCTION	1-5
	References	4
CHAPTER - 2	GENERAL CONCEPTS OF FLUORESCENCE	6-33
	General Aspects of Luminescence	6
	Types of Luminescence	6
	Photoluminescence : Fluorescence and Phosphorescence	7
	Environmental Effects on Fluorescence	11
	Effect of Solvent	11
	Effect of Heavy atom Solvent	13
	Effect of pH	13
	Effect of Hydrogen bonding	15
	Fluorescence in organic molecules	17
	Fluorescence in Heterocyclic compounds	21
	Fluorescence in coumarins	21 a
	Luminescence in Polymers	21 b
	Applications of Luminescence	22
	References	27
CHAPTER - 3	POLYMER	34-49
	Introduction	34
	Classification of Polymers	34
	Techniques of Polymerization	38
	Appliction of Polymers	41
	Molecular weight of Polymers	43
	Coumarins	44
	Derivatives of Coumarin	45
	Reactivity of Coumarins.	46
	References	48

CHAPTER - 4	EXPERIMENTAL TECHNIQUES	50-61
	Synthesis of Monomer and its co-polymers	50
	Synthesis of 5, 7 - Dihydroxy - 4 Methyl Coumarin	50
	Synthesis of Polymers	50
	Preparation of Acid Chlorides	50
	Polymerization	51
	Infrared Spectra	52
	Preparation of the Specimens	53
	(a) As received Monomer	53
	As received Polymers	54
	(b) Preparation of Solutions	54
	Instrumentation	55
	References	60
CHAPTER - 5	RESULTS AND DISCUSSION	62-68
	References	68
	CONCLUSION.	69
