

CONTENTS

CHAPTER NO	PAGE NO
I. INTRODUCTION	(1 TO 27)
1. Overview	1
1.1. Physiography and Geography of the Gangetic plains	5
1.2. Geology of the Gangetic plains	7
1.3. Mythological importance of the Ganges	11
2. Study Area	11
2.1. Climate	13
2.2. Geology	16
2.3. Physiography	16
2.3.1. Geography	19
2.4. Flora and Fauna	20
2.4.1. Flora	20
2.4.2. Fauna	20
3. Aims and Objectives	22
4. Methodology	25
II. PREVIOUS WORK	(28 TO 42)
III. APPROACH AND DATA USED	(43 TO 62)
3. Basis of Remote Sensing	43
3.1. Importance of Remote Sensing in Geomorphological Studies	48
3.2. Data Used	51
3.3. Feature extraction or the RS techniques used in the present study	52
3.3.1. Generation of database and feature extraction from SOI maps or base map preparation	52
3.3.2. Generation of database and feature extraction from satellite images	53
3.4. Ground truth and Field data	62

IV. GEOMORPHOLOGY: A BRIEF ACCOUNT	(63 TO 80)
4. Definition	63
4.1. Geomorphic Process	64
4.1.1. Exogenous and Endogenous processes	64
4.2. Fundamental concepts in Geomorphology	65
4.3. Fluvio-Geomorphology	66
4.3.1. Principles	66
4.4. Fluvial Landforms	69
4.4.1 Types of river patterns	72
4.5. Fluvial Processes	78
V RESULTS AND DISCUSSION <i>(in complete)</i>	(81 TO 186)
VI CONCLUSIONS	(187 TO 195)
REFERENCES	(196 TO 206)
