

Table of Contents

CHAPTER-1

1. Introduction and review literature	1
1.1 Anatomy of Prostate Gland	1
1.2 Histology of Prostate gland	1
1.3 Cellular organization and their molecular markers in adult prostate	3
1.4 Prostate Gland Development in human and rodent	3
1.5 Physiological function of the prostate	5
1.6 Prostate Endocrinology	6
1.6.1 Androgens	7
1.6.2 Estrogens	10
1.7 Prostatic disorders	11
1.7.1 Prostatitis	12
1.7.2 Prostate enlargement	12
1.7.2.A Benign Prostatic Hyperplasia (BPH)	13
1.7.2.1 Epidemiology	13
1.7.2.2 Pathophysiology	14
1.7.2.3 Role of Hormonal imbalance in BPH pathogenesis	14
1.7.2.4 Role of stem cells in BPH pathogenesis	16
1.7.2.5 Stromal – Epithelial interaction	17
1.7.2.6 Hereditary and Genetic polymorphism	18
1.7.2.7 Risk Factors	19
1.7.2.7.a Age	19
1.7.2.7.b Diet and Metabolic Factors	19
1.7.2.7.c Environmental pollutants	20
1.7.3 <i>In-vivo</i> and <i>in-vitro</i> models for studying BPH pathogenesis	21
1.7.3.1 Human Cells	22
1.7.3.2 Hormone Induced Model	22
1.7.4 Treatment options for BPH	22
1.7.4.1a Alpha blockers	22
1.7.4.1b 5 α -reductase inhibitors	23
1.7.4.1c Phytotherapy	23
1.7.4.2 Surgical treatments	23
1.7.5 Future Treatments	24
1.7.2.B Prostate Cancer (PCa)	25
1.8 Link between BPH and PCa	25
1.9 References	28

CHAPTER-2

2.1 aim and rationale of the study	40
2.2 Objectives	42

CHAPTER-3

3.1 Introduction	44
3.2 Materials and Methods	46
3.2.1 Chemicals	46

Table of Contents

3.2.2 Animals	46
3.2.3 Time-dependent Study	46
3.2.4 Age dependent study	47
3.2.5 Castration study	47
3.2.6 Prostatic acid Phosphatase Analysis	47
3.2.7 ROS parameters	47
3.2.8 Histological examination	48
3.2.9 Antagonist studies	48
3.2.10 Relative gene expression studies	48
3.2.11 Immuno-histochemistry	49
3.2.12 Statistical Analysis	49
3.3 Results	50
3.3.1 Time Dependent Study	50
3.3.2 Age Dependent Study	51
3.3.3 Confirmation of BPH model by histological studies	52
3.3.4 Mechanism of cadmium in prostate hyperplasia induction	53
3.3.5 Relative gene expression and Immunohistochemistry	56
3.4 Discussion	60
3.5 References.....	64

CHAPTER-4(A)

4(A).1 Introduction.....	69
4(A).2 Materials and Methods.....	71
4(A).2.1 Prostate samples	71
4(A).2.2 Chemicals	72
4(A).2.3 Isolation of prostate cells from TURP samples	72
4(A).2.4 Cell Growth kinetics	72
4(A).2.5 Karyotyping	72
4(A).2.6 RNA extraction and semi quantitative RT-PCR	73
4(A).2.7 Western blotting	73
4(A).2.8 FACS analysis	74
4(A).2.9 Immunocytochemistry	74
4(A).2.10 <i>In-vitro</i> Differentiation	74
4(A).2.10.1 Ectodermal lineage	74
4(A).2.10.2 Mesodermal lineage.....	74
4(A).2.10.3 Endodermal lineage.....	75
4(A).2.11 <i>In-vivo</i> Differentiation	75
4(A).3 Results.....	75
4(A).3.1 Prostate cells isolation and characterization	75
4(A).3.2 Growth curve and kinetics	78
4(A).3.3 Cytogenetic analysis	78
4(A).3.4 Stem cell characterization	78
4(A).3.5 Pluripotency features	79
4(A).3.6 <i>In-vitro</i> differentiation	80

Table of Contents

4(A).3.7 <i>In-Vivo</i> differentiation	84
4(A).6 Discussion.....	85
4(A).7 References	88

CHAPTER-4(B)

4(B).1 Introduction.....	93
4(B).2 Materials and Methods.....	94
4(B).2.1 Chemicals	94
4(B).2.2- Determination of Cytotoxic dose of Cd	94
4(B).2.3 Cell Culture	95
4(B).2.4 Cell Growth kinetics	95
4(B).2.5- RNA extraction and semi quantitative RT-PCR.....	95
4(B).2.6- Western blotting	96
4(B).2.7- FACS analysis	96
4(B).2.8- Immunocytochemistry	97
4(B).2.9- Cell cycle analysis	97
4(B).2.10- Migration assay	97
4(B).2.11 Zymographic analysis of MMP activity	97
4(B).3 Results.....	98
4(B).3.1 Evaluation of Cytotoxic Concentration of Cd (CC ₅₀)	98
4(B).3.2 Growth curve and kinetics	98
4(B).3.3 Morphology	99
4(B).3.4 Cell cycle analysis	100
4(B).3.5 Gene expression study	101
4(B).3.6 Protein profiling	103
4(B).3.7 p63 expression by Flow cytometry	104
4(B).3.8 Immunocytochemistry	105
4(B).3.9- Migration Assay	108
4(B).3.10 Zymography	109
4 (B).4 Discussion.....	110
4(B).6 References	113

CHAPTER-5

5.1 Introduction	117
5.2 Materials and Methods	119
5.2.1 Study subjects	119
5.2.2 Chemicals	119
5.2.3 Isolation of Genomic DNA and PCR	119
5.2.4 Confirmation of amplified gene	120
5.2.5 Restriction pattern for polymorphism	120
5.2.6 RNA extraction and cDNA synthesis	121
5.2.7- Protein Profiling	122
5.2.8 Statistical Analysis	122
5.3 Results.....	123

Table of Contents

5.3.1 Analysis of association between AR gene A/G polymorphism at position 1754 in exon-1 and susceptibility to BPH	123
5.3.2 Analysis of association between Prostate Specific Antigen (PSA) gene A/G polymorphism at ARE1 of PSA Promotor -158 A/G and susceptibility to BPH	123
5.3.3 Analysis of association between Estrogen Receptor- β (ER β) gene A/G polymorphism at position 1730 A/G 3'UTR in Exon -8 and susceptibility to BPH	124
5.4.4 Genotype correlation with smokers and non smokers	125
5.4.5 Genotype- Phenotype correlation	127
5.5 Discussion	129
5.6 References.....	133

CHAPTER-6

6.1 Summary.....	137
6.2 Conclusion.....	142

LIST OF TABLES AND FIGURES

Chapter-1	i
Chapter-3	i
Chapter-4(A).....	ii
Chapter-4(B).....	iii
Chapter-5	iii
Annexure-I: Consent form.....	v
