

## LIST OF FIGURES

Figure No	Title	Page No.
2.1	Ziehl Nielsen Stain of <i>M.Tb</i> showing the typical “clumping” of the bacteria. The acid- fast organisms appear pink and the background staining is blue.	21
2.2	Tuberculin skin test.	23
2.3	Mechanism of various antibiotics	27
2.4	Basic Structure of Immunoglobulin	41
2.5	Vaccine mechanism	46
2.6	Schematic presentation: Single Emulsion-evaporation	56
2.7	Schematic presentation: Double Emulsion-evaporation	56
2.8	Schematic presentation Salting out technique	57
2.9	Schematic presentation: Nano Precipitation	58
2.10	Various techniques to characterize nanoparticles	59
3.1	Plasmid map	92
3.2	Plasmid DNA on Agarose Gel Electrophoresis	95
3.3	IPTG inductions for ESAT-6 protein expression	108
3.4	IPTG inductions for Ag-85B protein expression	108
3.5	ESAT-6 Protein expressions	109
3.6	Ag 85B Protein expressions	110
3.7	Schematic Presentation of Affinity Chromatography	111
3.8	SDS-Gel Doc for Batch purification of Protein ESAT-6 and Ag85 B	113
3.9	SDS-Gel doc for scale up of ESAT-6 production with 100 mL culture	114
3.10	SDS-Gel doc for Scale up of ESAT-6 with 400 mL culture	115
3.11	SDS-Gel doc for Scale up of Ag85B with 400 mL culture	115
3.12	Dialysis Cassettes	117
3.13	Calibration Curve- Micro BCA Assay for Protein Quantization	122
3.14	ESAT-6 Antibody dilution curve	127
3.15	Ag-85B Antibody dilution curve	127
4.1	Scheme for synthesis Poly Lactide from Lactide and biodegradation into Lactic Acid	137
4.2	Surface engineering of B-PEG-PLA for protein conjugation	139
4.3	Bruker NMR Topsis v 2.1 spectrometers equipment	145
4.4	Calibration of GPC with PolyStyrene beads (mixture of known mol weight polymer)	146
4.5	Calibration curve for GPC	147
4.6	H <sup>1</sup> NMR Spectra for B-PEG	149
4.7	H <sup>1</sup> NMR Spectra for B-PEG-PLA	150
5.1	Contour plot of Particle size for ESAT-6	164
5.2	Surface plot of particle size for ESAT-6 encapsulated PLGA NPs	164
5.3	Contour plot of %EE for ESAT-6 protein	165
5.4	Surface plot of %EE for ESAT-6 protein	165

<b>Figure No</b>	<b>Title</b>	<b>Page No.</b>
5.5	Contour plot of Particle size for Ag 85B	166
5.6	Surface plot of particle size for Ag 85B encapsulated PLGA NPs	166
5.7	Contour plot of %EE for Ag85B	167
5.8	Surface plot of %EE for Ag85B	167
5.9	Schematic diagram of conjugation of protein with Sulfo-NHS-Biotin	171
5.10	SEM figure: B-PEG-PLA NPs- 200 nm	178
5.11	SEM figure: ESAT-6 conjugated Adjuvanted NPs	179
5.12	SEM figure: Ag 85B conjugated Adjuvanted NPs.	179
6.1	Times (mean square displacement) as a function for defining mode of transport	193
6.2	A comparison of particle transport mode for two different proteins conjugated to B-Peg-PLA Nano Particles with and without cationic surfactant DDAB	199
6.3	MSD plots for Ag85 B conjugated to B-Peg-PLA fabricated with DDAB	201
6.4	MSD plots for Ag85 B conjugated to B-Peg-PLA fabricated without DDAB	201
6.5	MSD plots for ESAT-6 conjugated to B-Peg-PLA fabricated with DDAB	202
6.6	MSD plots for ESAT-6 conjugated to B-Peg-PLA fabricated without DDAB	202
6.7	Diffusivity of Nano Particles in Mucus- control particles as well as test particles.	203
7.1	Stability studies of ESAT-6 at 2-8 °C and -20 °C	217
7.2	Stability studies of Ag-85B at 2-8 °C and -20 °C	217
8.1	Chamber for the Aerosol infection	224
8.2	Chamber for the Aerosol infection	224
8.3	Experiment outline	227
8.4	Comparative CFU studies in Lungs at Day 28	232
8.5	Comparative CFU studies in Lungs at Day 56	232
8.6	Comparative CFU studies in Spleen at Day 28	233
8.7	Comparative CFU studies in Spleen at Day 56	233
