

ACKNOWLEDGEMENTS

The research work incorporated in this thesis entitled, "Further Contributions to Attributes Acceptance Sampling Plans" for the Ph.D. degree is done by me during the period 1973-1977 under the guidance of Dr. A.G. Phatak, Reader in Statistics, Department of Statistics, Faculty of Science, the Maharaja Sayajirao University of Baroda, Baroda. I wish to express my sincere thanks to Dr. A.G. Phatak for suggesting the topic and to acknowledge gratefully his patient guidance and constant encouragement throughout the preparation of the thesis.

The essential impetus to this research work is provided by Professor (Mrs.) I.V. Bhanot, Head, Department of Statistics. I am deeply grateful to her for the research facilities provided in the department.

My thanks are due to Professor Merh, Dean, Faculty of Science, and the University authorities for sanctioning some funds to meet the expenses for the purchase of computer hours required for the computational work of chapters II and IX of

this thesis. I am also grateful to Mr. D.V.N. Sarma, Director of the Operations Research Group, Baroda, Dr. P. Dasgupta, Mr. Soham Desai and other members of the staff of the Operations Research Group, Baroda for helping me in utilization of the computer facilities.

My colleagues in the department Mr.H.C. Patel and Mr. N.B. Patel have helped me in going through the final draft of the thesis. I express my thanks to them. I have also received help from other colleagues of my department. I take this opportunity to thank them all.

I am thankful to the members of the office staff of my department for their help and co-operation. I express my sincere thanks to Mr. C.N. Kachhia for neat and clean typing of the final draft of the thesis in a very short period of time.

Baroda

May, 1977
