

C O N T E N T S

CHAPTER - I

<u>INTRODUCTION</u>	<u>PAGE</u>
Purpose of study	1
Geographic limits	6
Physiography and drainage	8
Communication	9
Climate	9
Floods	11
Flora	11
Fauna	12
Crops	12
History	13
Population	14
Object and scope of work	14
Salient features of the findings	15

CHAPTER - II

<u>BACKGROUND INFORMATION</u>	
General aspects	20
Stratigraphy	22
Bio-stratigraphy	24
Geomorphology	26
Structure and Tectonics	27

CHAPTER - III

GEOLOGICAL FRAMEWORK

Regional geology	33
Evolutionary history of the Cambay basin	41

CHAPTER - IV

METHODOLOGY

General	46
Sedimentological investigations	49
Technique of faunal study	52

CHAPTER - V

STRATIGRAPHY

General	54
Stratigraphy worked out by the present author	61

CHAPTER - VI

STRUCTURAL STYLE AND TECTONIC FRAMEWORK

General	88
Structural features of the study area	91
Details of individual structures	93
Tectonic setting	102
Mechanism of structural deformation	104

CHAPTER - VII

CENOZOIC SEDIMENTATION AND ENVIRONMENT OF DEPOSITION

General	110
Cambay basin Tertiary sedimentation	111

Cambay basin Quaternary sedimentation	114
Sedimentation and environment of deposition in study area	115

CHAPTER - VIII

NEOTECTONIC ACTIVITY

General	120
Evidences of neotectonic activities	122

CHAPTER - IX

GEOMORPHIC EXPRESSIONS

General	128
Geomorphic features from drainage analysis	131
Topographic profiles across geomorphic features	143
Significance of lineaments observed on aerial photographs and Landsat Image	147

CHAPTER - X

GEOLOGIC AND GEOMORPHIC EVOLUTION

Regional picture	151
Geological evolution of the study area	154
Geomorphological evolution of the study area	158

CHAPTER - XI

<u>RESUME</u>	160
<u>ACKNOWLEDGEMENT</u>	167
<u>LOCALITY INDEX</u>	169
<u>BIBLIOGRAPHY</u>	171
