

LIST OF FIGURES

<u>FIGURE</u>		<u>PAGE</u>
I.1	Location map and index map of toposheets of study area	7
I.2	Communication map of the study area	10
III.1	Tectonic map of part of Western India	35
III.2	Bouguer anomaly super-posed on condensed Regional Geology map of Western India	38
III.3	Location of DSS profiles and crustal depth section along Mehmedabad-Billimora profile	40
IV.1	Geological map of the study area	48
IV.2	Map of the study area showing location of field observations	50
V.1	Geological section across northern part from Dadhal to Hutiyapur high	65
V.2	Geological section across Dinod anticline	66
VI.1	Structural features of south Cambay basin	90
VI.2	Folding and reverse faulting of Tertiaries	101
-A	Seismic section showing Narmada reverse fault	101
-B	Geological section across Ankleshwar-Kosamba fields	101

VI.3	Structural elements along Narmada river	105
VI.4	Narmada tectonic belt in Western India	109
VIII.1	Interpreted structural features from Landsat Image	123
IX.1	Drainage controlled regional geomorphological features of the study area and around it	133
IX.2	Folding and reverse faulting of Tertiaries	136
-A	Seismic section across Ankleshwar anticline showing Ankleshwar reverse fault along SE limb	136
-B	Seismic section across Kosamba anticline showing Kosamba reverse fault along SE limb	136
IX.3	Topographic profiles, A-A' and B-B'	144
