

ACKNOWLEDGEMENT

This multidisciplinary research correlating terrain, geology, geomorphology, soils, surface & subsurface water with flora and fauna, has been completed only with the guidance, help and labour of numerous academic, professional, technical and administrative personnel from various organisations. The author is of the strong belief that without the help from any of the above people, it would have been next to impossible to complete this research.

The author wishes to express his deep sense of gratitude to Dr. Pankaj K. Patel, Lecturer, Dept. of Geology, M.S. University of Baroda, under whose guidance and supervision the present investigation was conducted. Without his constant and unreserved inspiration, the author would not have been able to complete this research.

The author would like to thank Prof. S.J. Desai, Head, Dept. of Geology, M.S. University of Baroda, for providing necessary help and facilities. Heartfelt thanks are also due to Prof. D.R. Gadekar and Prof. N.M. Vashi.

The author is highly indebted to Dr. G.M. Oza, 'Global-500' Laureate and Professor, Dept. of Botany, M.S. University of Baroda, for his constant encouragement, help and liberty to use his personal library.

The co-operation of the Gujarat State Forest Department personnel, especially, Shri H.A. Vaishnav, Shri R.L. Java, Shri Tikader (Sanctuary Suprintendent), Shri Kataria (RFO) and Shri V.B. Patel (RFO) was essential throughout the course of this research.

The author is greatly indebted to Shri S.A. Chavan (former Conservator of Forest, Wildlife Circle), Dr. S.K. Sinha (CCF), Shri D.S. Narve (DFO) and Shri Bharat Pathak (former Sanctuary Suprintendent), with whom the ideas here set forth have been debated and discussed critically; the pool of their knowledge has broadened the author's understanding. The data on wildlife and vegetation was freely given by Shri S.A. Chavan and is highly appreciated. He also made necessary suggestions in the chapters on terrain factor control over lion habitat and management suggestions.

Special thanks are due to Prof. S.S. Merh, Senior Scientist & former Head, Dept. of Geology, M.S. University of Baroda, for his constructive criticism on the chapter on terrain factor control over lion habitat. Thanks are also due to Dr. S.P.H. Sychanthavong, U.G.C. Scientist, for his guidance in the tectonic interpretation of the study area.

The author is grateful to Dr. J.V. Amin, Consultant, Eco-environmental Project, Dept. of Botany, M.S. University of Baroda, for his comments on the chapter on soil resources.

The author is also thankful to Dr. S.R. Nayak and Mustak Shaikh, Space Application Centre, ISRO, Ahmedabad, for their guidance in interpreting satellite imagery.

The water resources aspects would not have been dealt so efficiently without the guidance and extraordinary help rendered by Dr. K.C. Tiwari, Lecturer, Dept. of Geology, M.S. University of Baroda. The author took liberty to encroach upon his valuable time, and is indebted to him for his help in carrying out resistivity soundings, providing necessary literature and offering fine constructive criticism on the water resources aspect.

Thanks are due to Shri P.M. Dave & Kiran Patel, PHEL, Baroda, Shri Desai, Soil Laboratory, GSFC, Baroda, and Dr. K.F. Patel & Shri D.R. Patel, GERI, Baroda, for their assistance in carrying out water and soil analysis.

The author would also like to heartfully thank his friends & colleagues, Dr. S.I. Vaid, Dr. S.J. Patel, Dr. S.F. Barodawala, A.B. Ojha, Ravi Pillai, Late Shri Ashok Joshi, M.B. Patel, T.R. Patel, P.M.V. Prasad, Uday Gaikwad and N.S. Gogate for their help and moral support during the tenure of this study.

Any research in the field of Geology is incomplete without maps and line drawings. The excellent maps and diagrams in this thesis have been made by Shri C.P. Mistry, who

painstakingly and diligently prepared them. His labour is greatly appreciated and the author wishes to express his heartfelt thanks to him. Shri Rohit Vyas provided not only the requested photographs, but opened up his treasure house of wildlife photographs from which the author could choose.

The author would like to thank Shri B.M. Chauhan for his assistance in taking some of the field photographs and preparing slides. Special thanks are due to Shri R.K. Parmar for his moral support and encouragement.

No words are sufficient to express a deep sense of gratitude to Shri A.A. Dave, Driver, Dept. of Geology, M.S. University of Baroda, for standing with the author during the long hot hours of fieldwork in a difficult, rugged and back-breaking terrain.

The author would like to thank all the staff members and research fellows of the Dept. of Geology for their kind co-operation and support.

The help rendered by Mr. Vikas Gupta and Mr. Vinod Semwal, M.Sc. students, is greatly appreciated.

The painstaking efforts of Shri S.I. Shah, Shri Harshad Patel and Shri Kiran Shah in the preparation and printing of the thesis is highly appreciated.

The author owes a great debt to his family members, relatives and friends, for their constant encouragement gave the necessary strength and inspiration to undertake & complete this research.

The author gratefully acknowledges the help of all other individuals who have helped in many ways and who remain unwittingly unacknowledged here.

The authors offers special thanks to his wife, Daksha, who had remained very understanding during the time when writing seemed to take up all the available time.

Finally, the author would like to thank the Rawson Academy of Aquatic Science, Canada, as it provided financial help for the completion of this research.

CHANDRAKANT D. PATEL
