

## List of Tables

<b>Table 2.1:</b>	<i>Stratigraphy, lithology, depositional environments, tectonic settings and fossil records of the rocks of the Andaman &amp; Nicobar Islands</i>	29
<b>Table 2.2:</b>	<i>Description of samples collected from the Andaman Islands</i>	38
<b>Table 2.3:</b>	<i>A comparison of measured and reported concentrations of various element oxides in the international standard SDO-1 (Devonian Ohio shale)</i>	45
<b>Table 2.4:</b>	<i>A comparison of measured and reported concentrations of various element oxides in the glass standard USNM 113716 (Basalt glass)</i>	46
<b>Table 2.5:</b>	<i>Measured Trace element concentrations in BHVO-2 compared with reported values</i>	49
<b>Table 3.1:</b>	<i>AMS <sup>14</sup>C ages of planktic foraminifera from core SK-234-60</i>	59
<b>Table 3.2:</b>	<i>Isotopic ratio data for ash layers in the core, ash deposits on Barren Island and lava flows of Narcondam Island.</i>	63
<b>Table 3.3:</b>	<i>Major element oxide contents (in wt %) of Plagioclase feldspar; pyroxene; olivine; titaniferous magnetite, amphibole and spinel in the ash layers of the core SK-234-60</i>	68
<b>Table 3.4:</b>	<i>Major element oxide contents (in wt %) of glass matrix in the ash layers of the core SK-234-60</i>	71
<b>Table 4.1:</b>	<i>Summary of salient features of potential source regions for Andaman Sediments sources:</i>	79
<b>Table 4.2:</b>	<i>Major oxide compositions (in wt. %) for siliciclastic sedimentary rocks of the Mithakhari Group and Andaman Flysch Group of Andaman Islands</i>	87
<b>Table 4.3:</b>	<i>Trace element concentration and isotopic ratio data for siliciclastic sedimentary rocks of the Mithakhari Group</i>	88
<b>Table 4.4:</b>	<i>Trace element concentration and isotopic ratio data for siliciclastic sedimentary rocks of the Andaman Flysch Group</i>	91
<b>Table 4.5:</b>	<i>Geochemical and isotopic data for sediments from core SK-234-60</i>	112
<b>Table 5.1:</b>	<i>Radiocarbon ages of fossil coral terraces of the Andaman and Nicobar Islands.</i>	143
