

List of Tables

Page no.

1.1	Major events of the world and India observed during the Proterozoic Eon.	5
2.1	The stratigraphic classification of the Vindhyan Supergroup (after Bhattacharyya 1996).	26
2.2	The fossil evidences with age connotation in the Vindhyan.	28
2.3	Radiometric Age data for the Vindhyan Super group.	32
2.4	Samples collected from the Vindhyan formations and pre-Vindhyan rocks exposed in Chittorgarh district.	44-46
2.5	Samples collected from the Vindhyan formations exposed in Bundi District.	47-48
2.6	Samples from the Balwan Limestone Formation near Lakheri town in Bundi district.	49-51
2.7	International rock standards used in various analytical techniques during the generation of major and trace elements data.	55
2.8	A comparison of measured and reported concentrations for various elements in SCO-1 standard.	56
2.9	Measured trace element concentrations in BHVO-2 compared with their reported values.	60
2.10	The dissolution procedure for silicate rocks.	61
2.11	Protocol for Sr and REE separation from sample solution.	62
2.12	Protocol for Nd separation from rest of the REE.	62
2.13	Protocol for Sr-separation using Sr-specific resin column chemistry.	63
3.1	Geochemical data for Pre-Vindhyan rocks and basal volcanics of the Vindhyan near Chittorgarh.	70
3.2	Geochemical data for samples from various formations of the Semri Group.	71-75
3.3	Geochemical data for samples from the Kaimur Group.	76
3.4	Geochemical data for samples from various formations of the Rewa Group.	77-79
3.5	Geochemical data for samples from various formations of the Bhandar Group.	80-86
3.6	U-Pb Analytical data for detrital zircons from the Sawa Sandstone, Bojunda, and Chittorgarh.	87-89
3.7	$\delta^{13}\text{C}$ and $\delta^{18}\text{O}$ of the international standard NBS-19 and the local standard MMB.	90
3.8	C and O isotopic compositions in samples from Lakheri Limestone.	90
3.9	C and O isotopic compositions in samples of Balwan Limestone.	91-92
3.10	Trace element data for selected samples from the Balwan Limestone.	92
3.11	Sr isotopic ratio data for carbonate components from limestone formations of the Upper Vindhyan.	93
