

LIST OF FIGURES

Fig No.	Title	Page No.
1.1	Location map of Banaskantha district	6
1.2	Physiography and drainage map of Banaskantha district	8
1.3	Drainage pattern of Banaskantha district	9
1.4	Structural setup of Banaskantha district	12
1.5	Isohyte map of Banaskantha district	13
1.6	Communication map of Banaskantha district	18
1.7	Demographic map of Banaskantha district	20
2.1	Regional Geological setup of study area.	24
2.2	Tectonic setting of Gujarat	25
2.3	Structural setup of Cambay Basin	27
2.4	Geological map of Banaskantha district	29
2.5	Raingauge and Rivergauge sites in Banaskantha district	40
2.6	Watershed map of Banaskantha district	42
2.7	Location of GWRDC Observation wells	49
2.8	Soil map of Banaskantha district	54
3.1	Regional Geoenvironmental setup of Banaskantha district	66
3.2	Geoenvironmental units of Banaskantha district	68
4.1	Physiographic map of ERH unit	81
4.2	Soil map of Eastern Rocky Highland	94
4.3	River basin map of Banaskantha district	102
5.1	Physiographic map of CAP Unit	119
5.2	Soil map of Central Alluvial Plain unit	118
6.1	Physiographic map of WSW Unit	131
6.2	Soil map of Western Saline Wasteland	144
7.1	Irrigation map of Banaskantha district	165

7.2	Schematic diagram of pond induced groundwater recharge mound	168
7.3	Layout of Scott Canal	170
8.1	Hydrogeological framework of Gujarat	180
8.2	Schematic hydrogeological section (E-W) of Banaskantha district	181
8.3	Schematic section showing common recharge zone	187
8.4	Hydrogeological map of Banaskantha district	189
8.5	Hydrogeological section along Banas river between Bhandotara and Sardarpura	192
8.6	Waterlevel fluctuations of phreatic aquifers 3 units of Banaskantha district	197
8.7 (a)	Difference in piezometric and phreatic water levels in the district	200
8.7(b)	Difference in quality variations at same location in the district	201
8.8	Water level fluctuations of confined aquifers in three units of Banaskantha district	202
8.9 (a)	Groundwater quality variations in phreatic aquifers of the district	206
8.9 (b)	Groundwater quality variations in confined aquifers of the district	207
