

## **ACKNOWLEDGEMENTS**

The author expresses his deep and profound gratitude towards Dr. P. P. Patel, Reader, Department of Geology, under whose able guidance and innovative ideas, the research work was successfully carried out. His sustained help, support and guidance made possible to complete the thesis by the author.

The author is grateful to Prof. M. P. Patel, Head, Department of Geology, for extending all the facilities of the department and taking keen interest in the research.

Hearty thanks are due to Dr. N. Y. Bhatt and Shri P. M. Solanki, Lectures in Geology Department, M. G. Science Institute, Ahmedabad for widening the horizons of his thoughts through fruitful discussions and also for continuous and tireless involvement in completing the thesis.

Sincere thanks are due to the Principal Dr. Chaitanya G. Dave, M. G. Science Institute for his continuous moral support during the course of research work.

He is also thankful to Dr. L. S. Chamyal, Reader, Department of Geology for his interest and valuable help at various stages of the work.

Encouragement and academic help extended by Prof. V. D. Dave and Prof. G. B. Pandya, Ex-Heads of Geology Department, M. G. Science Institute is gratefully acknowledged.

Thanks are also due to number of students who have helped the author in many ways and without their hard work it would not have been possible to complete the work.

The author wishes to put on records the help given by Smt. Sarojben Shah, Shri V. J. Shrimali and Shri Sendhaji of M. G. Science Institute.

Help received from various government and semi-government organizations like GWRDC, GWSSB, SAC, GSI, AUDA and AMC is also duly acknowledged.

Smt. Shantaben Patel (Dr. P.P. Patel's wife) is also thanked for her hospitality and cooperation during long hours of working.

Finally, the author expresses his gratefulness to his parents, his wife Videha, children Tapan and Bindi as well as all the relatives who showered their blessings and best wishes which made the work easy.
