<u>Chapter I : INTRODUCTION</u>	1
General	1
Scope of the present work	6
Brief Geology	8
<u>Chapter II : PREVIOUS WORK</u>	13
1. Himalayas in general	15
2. Previous work in Kumaon Himalaya	52
3. Previous work in Ranikhet and neighbouring area	58
<u>Chapter III: GEOLOGICAL SETTING</u>	64
Succession	65
A. <u>Main lithological types</u>	67
B. <u>Megascopic characters</u>	69
(i) Pelites and allied rocks	69
(ii) Semi-pelites	74
(iii) Psammites	74
C. <u>Distribution and Field Characters</u>	76
Pilkholi Series	76
Chaubatia schists	76
Jhuladevi gneiss	85
Paniali schistose group	91

Upradi thrust	98
Bajina Series	99
<u>Stratigraphy and Correlation</u>	104
Garhwal Nappe	106
Krol Nappe	108
<u>Chapter IV : PETROGRAPHY</u>	111
<u>Pilkholi Series</u>	112
Chaubatia schists	112
Pelitic schists	113
Semi-pelitic schists	118
Psammities	120
Jhuladevi gneiss	123
Felspathic schists	124
Permeation gneiss	126
Augen gneiss	127
Porphyroblastic gneiss	130
Igneous intrusion in gneiss	135
Paniali schistose group	136
Garnet mica schist	137
Chlorite schist	140
Phyllonites	142

<u>Bajina Series</u>	145
Pelites	145
Green chloritic phyllites	146
Sericitic phyllites	147
Dark siliceous phyllites	148
Psammites	149
Dolomitic limestone	151
<u>Chapter V : METAMORPHISM</u>	153
A. <u>Metamorphism of the rocks of Garhwal Nappe (? Chandpurs)</u>	154
Nappe <u>Nappe</u> :	155
(i) Progressive metamorphism	156
Pressure conditions	157
Temperature conditions	158
Mineral assemblages	161
Facies	163
(ii) Migmatisation	164
Granitisation and migmatisation	167
Evidence of migmatisation	169
1. Field criteria	170
2. Petrographic criteria	173
3. Chemical criteria	176

The process and stages of migmatiation	179
(iii) Retrogressive metamorphism	184
1. Textural and mineralogical changes	187
2. Cause of the retrogressive metamorphism	189
3. Date of the retrogressive metamorphism	189
Quartz veins	190
B. <u>Metamorphism of the rocks of Krol Nappe</u>	191
Mineral assemblages	192
(i) Pelites	192
(ii) Psammites	193
(iii) Calcareous rocks	193
Nature of foliation	194
C. <u>The phenomenon of Metamorphic Convergence</u>	194
<u>Chapter VI : STRUCTURE</u>	196
I. <u>Structural elements of the rocks of Garhwal Nappe</u>	203
(1) Minor structures related to the Ranikhet overfold	203

(A) Planar structures	203
(i) Bedding (S)	203
(ii) Schistosity and gneissic foliation (S_1)	204
(iii) Axial planes of the minor folds	208
(B) Linear structures	208
(i) Axes of the minor folds (L_1)	209
(ii) Quartz rods and Boudinage (L_1)	210
(iii) Mineral orientation(L_1)	210
(iv) Lineation due to striping(Ribbon) (L_1)	211
(2) Minor structures related to the Upradi thrust	212
(A) Planar structures	212
(i) Phyllonitic cleavage(S_2)	212
(ii) Axial planes of the drag folds (S_2)	212
(B) Linear structures	213
(i) Axes of the drag folds (L_2)	213
(ii) Puckering due to thrust (L_2)	215
Nature and geometry of Upradi thrust	215

(3) Minor structures (?) related with the folding of the Garhwal thrust	217
(A) Planar structure	217
(i) Axial plane of the herring-bone type chevron folding and the related strain-slip cleavage (S_3)	217
(B) Linear structure	218
(i) Puckers related to the chevron folding (L_3)	218
(4) Minor structures related with the late N-S folding	219
II. <u>Structural elements of the rocks of Krol Nappe</u>	220
(A) Planar structures	220
(i) Sedimentary bedding (S')	220
(ii) Slaty and phyllitic cleavage (S'')	220
(iii) Axial plane of the chevron folds and strain-slip cleavage(S_3')	221
Deformation of structural elements	222
1. Effect of episode(II) on structures related to episode(I)	223
2. Effect of episode(III) on structures related to episode(I)	223

3. Effects of episode(IV) on structures related to episode (I and II)	223
4. Effects of episode(IV) on the related structures of episode (III)	223
III. <u>Faults</u>	224
(i) Philpitri-Jhuladevi dislocation (F_1)	224
(ii) Kotali-Bajina dislocation(F_2)	225
(iii) Tipawala-Telgaon dislocation (F_3)	225
IV. <u>Joint pattern</u>	228
<u>Chapter VII : METAMORPHISM IN RELATION TO STRUCTURE</u>	231
Folding of the geosynclinal sediments and the accompanying progressive metamorphism.	232
Migmatiation in relation to folding.	233
Thrusting and the related Retrogression.	234
Post-thrusting folding and the development of the strain-slip cleavage.	234
Late N-S folding and faulting.	236
Time relation between structural and metamorphic events	238

- viii -

<u>Chapter VIII : SUMMARY AND CONCLUSION</u>	240
(A) Outline of the geological history	240
(B) Concluding Remarks	242
ACKNOWLEDGEMENTS	246
REFERENCES	247
