List of Tables	I
List of Figures.....	II
Acknowledgments	III
Dedication.....	IV
Abstract	V
1. Introduction	1
1.1 Plant development and PCD	1
1.2 PCD and Proteases	2
1.3 Caspase-like Proteases	3
1.4 Identification of Metacaspases (MCs).....	3
1.5 Role of Metacaspases (MCs).....	4
1.5.1 Role of yeast metacaspases	4
1.5.2 Role of plant metacaspases	4
1.5.3 Non death role of metacaspases	6
1.6 Metacaspases in tomato.....	6
1.7 Tomato metacaspases.....	7
1.8 Aim and Objectives	7
2. Review of literature.....	8
2.1 Metacaspases in protists and algae.....	8
2.2 Metacaspases in fungi.....	12
2.3 Plant Metacaspases.....	15
3. Material and methods.....	23
3.1 Identification of metacaspase gene family in tomato genome	23
3.1.1 Protein properties and gene structure analysis.....	23
3.1.2 Multiple sequence alignment and phylogenetic analysis.....	23
3.2 Analysis of Cis-regulatory elements in promoter sequences.....	23
3.3 Plant materials and gene expression analyses.....	23
3.4 RNA isolation.....	24
3.5 DNase I treatment.....	24
3.6 First Strand cDNA synthesis.....	25
3.7 Gene expression analysis using semi-quantitative PCR.....	28
3.8 Expression analysis using Quantitative RT-PCR (qRT-PCR).....	29

3.9	Cloning of promoter and gene silencing constructs.....	29
3.9.1	Cloning of Promoter of SolycMC4.....	29
3.9.2	Cloning of amiRNA-SolycMC4.....	29
3.9.3	BP and LR recombination reaction.....	31
3.9.4	<i>E. coli</i> transformation.....	32
3.9.5	Plasmid Isolation.....	33
3.9.6	<i>Agrobacterium</i> transformation.....	33
3.9.7	<i>Agrobacterium</i> -mediated genetic transformation of tomato.....	33
3.10	Genotyping of SolycMC4 promoter: GUS and 35S::amiRNA-SolycMC4 lines.....	33
3.11	Expression analysis using PromSolycMC4::GUS lines.....	33
3.12	Expression analysis of SolycMC4 silencing and overexpressing lines.....	34
3.13	Phenotypic analysis and plant growth measurments.....	34
3.14	Anatomical analysis.....	34
3.15	Detection of Hydrogen peroxide (H ₂ O ₂) accumulation.....	34
3.16	Antioxidant enzymes assays.....	34
3.16.1	Enzyme extraction.....	35
3.16.2	Catalase (CAT) assay.....	35
3.16.3	Superoxide dismutase (SOD) assay.....	35
3.16.4	Ascorbate peroxidase (APX) assay.....	35
3.16.5	Guaiacol peroxidase assay.....	36
3.16.6	Estimation of total chlorophyll.....	36
3.16.7	Anthocyanin Measurement.....	36
3.17	Expression analysis of Senescence marker genes.....	36
3.18	Expression analysis of Programmed Cell death (PCD) marker genes.....	37
3.19	Expression analysis of Chloroplast associated marker genes.....	37
3.20	Mitochondrial Complex I activity.....	37
3.21	Subcellular localization of 35S::SolycMC4::GFP fusion protein.....	38
3.22	Statistical analysis.....	38
4.	Results.....	47
4.1	Identification and <i>In-silico</i> analysis of tomato metacaspase.....	47
4.1.1	Identification and Nomenclature of tomato metacaspases.....	47
4.1.2	Phylogenetic analysis and conserved motifs of tomato metacaspases.....	48
4.1.3	Molecular properties and gene structure of tomato metacaspases.....	49
4.1.4	Gene structure analysis.....	54

4.2	Identification of cis-regulatory elements in promoter sequences of tomato metacaspase genes.....	54
4.3	Expression analysis of tomato metacaspases during plant development.....	55
4.4	Functional analysis of tomato SolycMC4 gene.....	61
4.4.1	Spatiotemporal expression analysis of PromSolycMC4::GUS lines.....	61
4.4.2	Silencing of SolycMC4 by amiRNA-SolycMC4 in tomato.....	62
4.4.4	Subcellular localization of SolycMC4::GFP fusion protein.....	80
5.	Discussion.....	84
6.	Summary.....	90
7.	References.....	95
