

## CONTENTS

1. INTRODUCTION	Page No.
• Aim and scope	3
Preface to the study area	4
Physiography and drainage	9
Previous work	11
2. GEOLOGY AND STRUCTURE	
Regional Geology	15
Structure and Tectonics	25
<ul> <li>Igneous activity in the Kachchh region and its</li> </ul>	
relationship with tectonics	30
• Faults and folds showing change in the stress regime in	
the Kachchh Peninsula	32
<ul> <li>Thickness of Quaternary deposits to the north of KMF</li> </ul>	34
3. GEOMORPHOLOGY	
Geomorphology of the Kachchh Mainland	36
• Island Belt	39
Wagad Highland	40
Banni Plain	40
• Alluvial Plains	40
• The Great Rann	41
• Drainage	44
<ul> <li>Geomorphology and drainage pattern of the area</li> </ul>	
along the KMF	46
4. MORPHOMETRIC ANALYSIS	
Materials and methods	54
<ul> <li>Parameters of Morphometric Analysis</li> </ul>	55
<ul> <li>Pattern of Drainage network</li> </ul>	59
<ul> <li>Valley Cross Section</li> </ul>	75
<ul> <li>Long Profile Analysis</li> </ul>	80
<ul> <li>Mountain Front Sinuosity</li> </ul>	82
• River Sinuosity	84
5. NEOTECTONICS	
• Neotectonism in the area	92

Historical Seismic Records	92
Geological Evidences of Neotectonism	. 100
• Morphometric indicators of Neotectonism in the area	103
• Coseismic activities due to Bhuj (2001) earthquake	104
• Transverse faults to the KMF and their active nature	114
6. GEOMORPHIC EVOLUTION	
GEOMORI IIIC EVOLUTION	117
7. SUMMARY AND CONCLUSIONS	130
REFERENCES	140
List of Figures	iii
List of Tables	iv
