Abstract	v

Chapter 1

Introduction

1.1	Introduction	1
1.2	Tropics and Teak (<i>Tectona grandis</i>)	2
1.3	Oxygen isotopes in tree cellulose	2
1.4	Factors influencing $\delta^{18}\text{O}$ of tree cellulose	3
1.4.1	Atmospheric processes	3
1.4.2	$\delta^{18}\text{O}$ of atmospheric vapor	6
1.4.3	Soil hydrological processes	6
1.4.4	Plant physiological processes	8
1.5	A brief review of the experimental isotope dendroclimatology	11
1.5.1	Components of wood other than cellulose	14
1.6	Previous isotope dendroclimatological investigations in the tropics	15
1.7	Rationale behind the approach	17
1.8	Statement of the problem	19

Chapter 2

Regional climate settings, materials and methods

2.1	Introduction	21
2.2	Climatology of sample locations	23

2.3	Rainfall $\delta^{18}\text{O}$ record	26
2.4	Sample collection	30
2.5	Ring separation and powdering	32
2.6	Extraction of α -cellulose	34
2.7	FTIR spectroscopy of extracted α -cellulose	36
2.8	Mass spectrometric measurements and analytical precision	37
Chapter 3	Sub-annual $\delta^{18}\text{O}$ record in teak	
3.1	Introduction	40
3.2	Rings selected for sub-annual cellulose $\delta^{18}\text{O}$ studies	42
3.3	Assigning time to sub-annual segments	43
3.4	Model used for explaining sub-annual cellulose $\delta^{18}\text{O}$ variations	44
3.5	Sub-annual cellulose $\delta^{18}\text{O}$ variations	46
3.6	Rainfall, relative humidity and $\delta^{18}\text{O}$ of cellulose	51
3.7	Rainfall with seasonally changing $\delta^{18}\text{O}$ and sub-annual cellulose $\delta^{18}\text{O}$ variations	54
3.8	Time resolution achievable by sub-annual sampling	57
3.9	Conclusions	57
Chapter 4	Inter-annual $\delta^{18}\text{O}$ record in teak	
4.1	Results	60
4.2	Discussion	66

4.2.1	Coherence of tree ring (ring-width, ring-width index and cellulose $\delta^{18}\text{O}$) record	69
4.2.2	Correlation of ring-width with rainfall and cellulose $\delta^{18}\text{O}$ record	72
4.2.3	Correlation between cellulose $\delta^{18}\text{O}$ and rainfall record	74
4.2.4	Reconstruction of past climate using cellulose $\delta^{18}\text{O}$ record	79
Chapter 5	Summary and recommendations	
5.1	Summary of the results	82
5.2	Recommendations	85
References		88-98
