

C O N T E N T S

CHAPTER		PAGE
	INTRODUCTION	1
1	Histological observations on the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	11
2	Histochemical observations on lipids, lipase and esterase; and quantitative levels of total lipids in the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	47
3	Histochemical observations on glycogen and phosphorylase and quantitative glycogen content in the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	75
4	Histochemical observations on acid phosphatase in the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	100

CHAPTER		PAGE
5	Histochemical localization of alkaline phosphatase in the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	118
6	Histochemical studies on the nucleic acids (DNA and RNA) in the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	138
7	Histochemical localization of cholinesterase in the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	154
8	Quantitative and histochemical studies on ascorbic acid in the normal and regenerating tail of the Scincid lizard, <u>Mabuya carinata</u>	167
9	General Considerations	183
	SUMMARY	200
	BIBLIOGRAPHY	209
