

CONTENT

CHAPTERS	PAGE
INTRODUCTION	1-23
1. Absence of diurnal variation in glycogen levels of glycogen body of adult feral pigeon, <i>Columba livia</i> during the warmer months.	24-33
2. Lactate dehydrogenase isoenzymes in the glycogen body & spinal cord during post-hatched development of domestic fowl, <i>Gallus domesticus</i> & adult feral pigeon <i>Columba livia</i> .	34-46
3. Pattern of amino acids in the glycogen body & spinal cord of 2 week old developing chicks of domestic fowl <i>Gallus domesticus</i> .	47-57
4. Effect of ammonia loading on glycogen content and phosphorylase and glycogen synthase enzyme activities in the glycogen body of 5 day old post-hatched chicks of domestic fowl, <i>Gallus domesticus</i> .	58-79
5. Ultrastructural morphology of glycogen body of chick of domestic fowl & adult pigeon.	80-98
6. Fluoride induced alteration in various metabolites and certain enzymes of glycogen body in the post-hatched developing chicks of domestic fowl, <i>Gallus domesticus</i> .	99-120
SUMMARY	121-126
GENERAL CONSIDERATIONS	127-136
BIBLIOGRAPHY	137-156
