

List of Figures

Figure Number	Title	Page number
Fig. 1.1	Origin of Neuroblastoma	3
Fig. 1.2	Neural crest development and Neuroblastoma	5
Fig. 1.3	N-MYC/MYCN acts as a Cancer Stem Cell Factor in the Developing Neural Crest and Promotes Tumorigenesis in Neuroblastoma	6
Fig. 1.4	Involvement of growth factors, growth factor receptors and chaperones in cancer cell invasion	8
Fig. 1.5	Schematic diagram of IGF-IR	10
Fig. 1.6	Key components of the IGF-IR Pathway	11
Fig. 1.7	Schematic representation of IGF signaling regulation in EMT	14
Fig. 1.8	miRNA deregulation in cancer	18
Fig. 1.9	Structure of Picropodophyllotoxin	21
Fig. 1.10	Schematic diagram of proposed hypothesis	23
Fig. 2.1	Representative image of SH-SY5Y cells	26
Fig. 3.1	Molecular docking of ligand-protein (PPP and IGF-IR)	50
Fig. 3.2	Molecular docking of ligand-protein (PPP and ALK)	51
Fig. 3.3	Effect of PPP on proliferation of NB cells after 24 hours of incubation	52

Fig. 3.4	Gene and Protein expression fold change of IGF-IR after 24 hours of PPP treatment to SH-SY5Y cell line	53
Fig. 3.5	Protein expression fold change of IR after 24 hours of PPP treatment to SH-SY5Y cell line.	54
Fig. 3.6	Gene and protein expression fold change of ALK after 24 hours of PPP treatment to SH-SY5Y cell line	55
Fig. 3.7	Gene expression fold change of apoptotic markers and kinases after 24 hours of PPP treatment to SH-SY5Y cell line.	56
Fig. 3.8	Gene expression fold change of transcription factors and EMT markers after 24 hours of PPP treatment to SH-SY5Y cell line.	57
Fig. 3.9	Representation of fold change in miRNA expression	58
Fig. 3.10	ICC of IGF-IR	59
Fig. 3.11	ICC of ALK	60
Fig. 3.12	ICC of NF- κ B	61
Fig. 3.13	Inhibition of cell proliferation on exposure of PPP – Scratch assay	62
Fig. 3.14	Annexin V-FITC/PI analysis using Flow cytometry for apoptosis inducing activities of PPP in SH-SY5Y cancer cells.	63
Fig. 3.15	Cell death analysis by AO/EtBr Staining	64
