

TABLE OF CONTENTS

1.	Introduction	1-21
1.1.	Forests and Forestry	02
1.2.	Evolution of Human-Forest Relationships in India	02
1.2.1.	Human-Forest Interactions During the Era of Monarchs	03
1.2.2.	Progressive Erosion of People's Rights on Forests During the British Rule	03
1.2.3.	Rights of Forest Dwellers in the Independent India	04
1.2.4.	A Major Shift in Indian Forest Policy	06
1.3.	Joint Forest Management (JFM)	06
1.3.1.	The Informal Origin of JFM	07
1.3.2.	Highlights of JFM Program	08
1.3.3.	Source of Funding for JFM	08
1.4.	Status of JFM	10
1.4.1.	Reports of Community-Based Forest Management in World	10
1.4.2.	Status of JFM in India	10
1.4.3.	Status of JFM in Gujarat State	13
1.5.	Gujarat Government Resolution on JFM	15
1.5.1.	The Formation, Structure and Status of JFM Committees	15
1.5.2.	Purpose	17
1.5.3.	Responsibilities of Village Community	17
1.5.4.	Voluntary Organizations and their Responsibilities	17
1.5.5.	Responsibility of Forest Department	18
1.5.6.	Distribution of Benefits	19
1.6.	Reports of Studies on JFM	19
 2.	 Remote Sensing and GIS	 22-39
2.1.	Remote Sensing	22
2.1.1.	Principle	22

2.1.2.	Atmospheric Windows	24
2.1.3.	Spectral Signature	24
2.1.3.1.	Spectral Characteristics of Vegetation	26
2.1.4.	Data Acquisition	28
2.1.5.	Sensors and Satellites	28
2. 1. 5.1.	Indian Imaging Systems	29
2.1.6.	Application Trends of Various Sensors for the Study of Natural Resources	32
2.1.6.1.	Geology	32
2.1.6.2.	Hydrology	32
2.1.6.3.	Soil	32
2.1.6.4.	Agriculture	33
2.1.6.5.	Forests	34
2.2.	Synergy of RS and GIS	36
2.3.	Geographic Information System (GIS)	37
2.3.1.	Roots of GIS	37
2.3.2.	GIS and its Components	37
2.3.3.	The Data Model	38
2.3.4.	Application of GIS-based Remote Sensing	38
3.	Description of Study Area	40-50
3.1.	Geographical Location	40
3.2.	Historical Background	40
3.3.	Geology	40
3.4.	Soils	42
3.5.	Climate	43
3.6.	Water Supply	44
3.6.1.	India's Largest River Valley Project on Narmada River	44
3.7.	Human Population	45
3.8.	Fauna	45

3.8.1.	Wildlife	45
3.8.2.	Livestock	45
3.9.	Flora	46
3.9.1.	Agriculture	46
3.9.2.	Forests	46
3.9.2.1.	Forest Management in Narmada District	47
3.10.	Need of the Present Study	48
3.11.	Objectives	50
4.	Materials and Methods	51-68
4.1.	Materials	51
4.1.1.	Satellite Data	51
4.1.2.	Reference Maps	51
4.1.3.	Ancillary Data	51
4.1.4.	Field Data	51
4.1.5.	Software Used	52
4.2.	Methods	
4.2.1.	RS and GIS Analysis	52
4.2.1.1.	Base Map Preparation	52
4.2.1.2.	Spatial Frame Work	55
4.2.1.3.	Thematic Map Generation	55
4.2.1.4.	Importing Satellite Data	55
4.2.1.5.	Sub-setting	55
4.2.1.6.	Image Rectification	55
4.2.1.7.	Image Enhancement	56
4.2.1.8.	Band Ratioing	56
4.2.1.9.	Principal Component Analysis (PCA)	57
4.2.1.10.	Layer Stacking	57
4.2.2.	Forest Density Classification	57
4.2.2.1.	Supervised Classification	57
4.2.2.2.	On-screen Visual Interpretation	57

4.2.2.3.	Accuracy Assessment	59
4.2.3.	JFM Mapping	60
4.2.4.	Potential Sites for JFM Plantations	60
4.2.5.	Micro-level Assessment of JFM Program	60
4.2.5.1.	Selection of JFM villages for Micro-level Assessment	60
4.2.5.2.	Phytosociological Analysis	62
4.2.5.3.	Taxonomical Identification	64
4.2.5.4.	Primary Data Analysis	64
4.2.5.5.	Secondary Analysis	65
4.2.5.6.	Carrying Capacity of JFM Plantations	66
4.2.6.	Ranking of Villages	66
5.	Results	69-148
5.1.	RS and GIS Analysis	69
5.1.1.	Spatial Frame Work	69
5.1.2.	Thematic Map Generations	69
5.1.3.	Image Enhancements	77
5.1.3.1.	Band Combinations	77
5.1.3.2.	Raster Editing	77
5.1.3.3.	Band Rationing	77
5.1.3.4.	Principal Component Analysis (PCA)	78
5.1.4.	Layer Stacking	78
5.2.	Forest Density Classification	83
5.2.1.	Supervised Classification	83
5.2.2.	On-screen Visual Interpretation	86
5.2.3.	Spectral Profile of Different Classes	89
5.2.4.	Landuse/Landcover Statistics of Study Area	92
5.2.5.	Forest Classes in Each Taluka of Study Area	92
5.2.6.	Accuracy Assessment	99

5.3.	JFM Mapping	100
5.4.	Potential Sites for JFM Plantations	103
5.5.	Micro-level Assessment of JFM Program	105
5.5.1.	JFM Villages	105
5.5.1.1.	Geographic and Socio-economic Features	105
5.5.1.2.	Status of the Vegetation and Wildlife Before Protection	107
5.5.1.3.	Motivation of Protection	110
5.5.1.4.	The Institutional Arrangement- An Assessment	111
5.5.2.	Vegetational Analysis of JFM Plantations	117
5.5.2.1.	Plantation Strategy and Choice of Species	117
5.5.2.2.	Phytosociological Studies	118
5.5.2.3.	Phytodiversity	121
5.5.2.4.	Diversity and Dominance Index	134
5.5.2.5.	Index of Similarity	135
5.5.2.6.	Secondary Analysis	138
5.5.3.	Carrying Capacity of JFM Plantations	139
5.5.3.1.	Evaluation of Fodder Consumption	139
5.5.3.2.	Evaluation of Fuel Wood Consumption	141
5.5.3.3.	Supply Potential of the Plantations	141
5.5.3.4.	Sustainability of JFM Plantation	142
5.5.4.	Ranking of Villages	144
5.5.4.1.	Ecological Parameters	144
5.5.4.2.	Socio-economic Parameters	146
5.5.4.3.	Sum Rank	148
6.	Discussion	149-174
6.1.	Forest Density Classification	150
6.1.1.	Season Selection for RS and GIS Analysis	151
6.1.2.	Digital Analysis	151

6.1.2.1.	Image Enhancements	152
6.1.2.2.	Supervised Classification	153
6.1.3.	On-screen Visual Interpretation	154
6.1.4.	Merits and Demerits of Visual and Digital Interpretation	155
6.1.5.	Spectral Profile of Different Classes	156
6.1.6.	Landuse/ Landcover Statistics of the Study Area	157
6.2.	JFM Mapping	158
6.3.	Potential Sites For JFM Plantations	159
6.4.	Micro-Level Assessment of JFM Program	159
6.4.1.	Geographic and Socio-economic Features	160
6.4.2.	Forest Protection Institute	161
6.4.3.	Vegetational Analysis	164
6.4.4.	Carrying Capacity	171
6.4.5.	Ranking of the Villages	173
7.	Recommendations and Suggestions	175-180
7.1.	Remote Sensing & Geographic Information System	175
7.2.	Ecological	176
7.3.	Socioeconomic	178
7.4.	Institutional	179
8.	Summary and Conclusion	181-187
9.	References	188-206
10.	Annexure
