

LIST OF TABLES

1. Patients Profile: Number, Gender and Age of the ICU patients-----	106
2. Disease distribution and gender dominance pattern in the ICUs of the hospitals-----	106
3. Disease distribution and gender dominance pattern of G.I diseases---	107
4. Number of survived and expired ICU patients in the hospitals-----	108
5. Demographic Profile -----	114
6. Nutritional Status on admission-----	114
7. Assessment of nutrient intake: Average requirements <i>vs</i> average intakes-----	119
8 (a) Assessment of nutrient intake: Average requirements <i>vs</i> average intakes of 'Severely malnourished subcategory' as per Nutritional Risk Index (NRI)-----	120
8 (b) Assessment of nutrient intake: Average requirements <i>vs</i> average intakes of 'Mild-Moderately malnourished subcategory' as per Nutritional Risk Index (NRI)-----	121
8 (c) Assessment of nutrient intake: Average requirements <i>vs</i> average intakes of 'Well-nourished subcategory' as per Nutritional Risk Index (NRI)-----	122
9 (a) Biochemical levels at different stages of nutrition in Study groups-----	125
9 (b) Biochemical levels at different stages of nutrition in Subcategories-----	126
10. Impact of diets on weight gain/loss in the study groups-----	130
11. Impact of diets on weight gain/loss in the subcategories-----	130
12. Impact of diets on length of stay in the study groups and subcategories-----	134
13. Demographic Profile-----	140
14. Nutritional Status on admission-----	140

15. Assessment of nutrient intake: Average requirements vs average intakes-----	145
16 (a) Assessment of nutrient intake: Average requirements vs average intakes of 'Severely malnourished subcategory' as per Nutritional Risk Index (NRI)-----	146
16 (b) Assessment of nutrient intake: Average requirements vs average intakes of 'Mild-Moderately malnourished subcategory' as per Nutritional Risk Index (NRI)-----	147
16 (c) Assessment of nutrient intake: Average requirements vs average intakes of 'Well-nourished subcategory' as per Nutritional Risk Index (NRI)-----	148
17 (a) Biochemical levels at different stages of nutrition in Study groups-----	151
17 (b) Biochemical levels at different stages of nutrition in Subcategories-----	152
18. Impact of diets on weight gain/loss in the study groups-----	156
19. Impact of diets on weight gain/loss in the subcategories-----	156
20. Impact of diets on length of stay in the study groups and subcategories-----	161
21. Effectiveness of with/without glutamine enrichment on overall outcome of the study groups-----	187
