

## LIST OF TABLES

Table No	Title	Page No
2.1	Region wise summary of key breastfeeding and complementary feeding indicators	28
3.1	Indicators and tools for data collection: study I	66
3.2	Indicators and tools for process evaluation of the intervention	79
3.3	Indicators and tools for data collection pre-post intervention	80
4.1	Awareness and practices of the mothers regarding newborn feeding and breastfeeding	89
4.2	Major highlights of observations of breast feeding episodes	93
4.3	Awareness and practices of the mothers regarding top milk feeding	94
4.4	Awareness and practices of the mothers regarding complementary feeding	95
4.5	Major highlights of observations of complementary feeding episodes	99
4.6	Health related awareness and practices of the mothers	101
4.7	Practices related to feeding of the child during illness	103
4.8	Observation data of hygiene	104
4.9	Mean hygiene scores	105
4.10	Socio - economic profile of the mothers	115
4.11	Anthropometric measurements of the mother of index child	117
4.12	Malnutrition in the mother of index child	117
4.13	Reproductive history of the mothers	118
4.14	Mother's perception regarding her health and its effect on child Care	118
4.15	Role of child's mother in decision making in the family	119
4.16	Practices of the mother (with grandmother present and grandmother absent) regarding IYCF	121
4.17	Knowledge of grandmother regarding infant and young child feeding and support given in child Care	124
4.18	Comparison of the nutritional status of children with grandmother present and grandmother absent	128
4.19	Advice received by mother regarding IYCF	130
4.20	Various factors influencing IYCF practices among children (pooled data of children with grandmother present and grandmother absent)	131
4.21	Morbidity history of the child	138
4.22	Mean nutrient intake of the children	142
4.23	Mean nutrient intake of boys and girls	142
4.24	Weight and height of the children compared with the NCHS standard	144
4.25	Nutritional status of children by Weight-for-age Z score values	146
4.26	Nutritional status of children by Height-for-age Z score values	147
4.27	Nutritional status of children by Weight-for-height Z score values	147
4.28	Association of mother's Caregiving behaviours with child's nutrient intake	149
4.29	Association of selected resources of Caregiving with Caregiving and child's nutritional status	152
4.30	Home visits by <i>bachat mandal</i> (BM) members: positive and negative observations	160
4.31	Validation of the home visits by BM members: feedback from mothers	163
4.32	Validating the findings of BM members: comparing feedback of mothers regarding IYCF and Care giving behaviours followed by them during	165

<b>Table No</b>	<b>Title</b>	<b>Page No</b>
	intervention with those reported by BM members	
4.33	NEC messages recalled and benefits perceived by mothers	171
4.34	Change in awareness-practices of mothers regarding complementary feeding and their benefits: comparing intervention and control groups	174
4.35	Change in awareness-practices of mothers regarding complementary feeding	175
4.36	Change in awareness-practices of mothers regarding intake of protective foods	177
4.37	Change in hygiene behaviours of mothers	180
4.38	Change in practice scores of mothers: comparing intervention and control groups	181
4.39	Change in practice scores of mothers	182
4.40	Mothers reporting positive IYCF practices <sup>@</sup> in different age groups	185
4.41	Direct observations regarding the positive as well as negative IYCF behaviours of the mothers in NEC-DIR (observations of feeding episodes)	186
4.42	Change in awareness of mothers regarding child health	187
4.43	Effect of number of home-visits on change in IYCF practices of mothers	189
4.44	A matrix showing reasons behind positive and negative change in feeding behaviours	192
4.45	Community based NEC interventions: impact on child feeding knowledge- practices and Care	198
4.46	Morbidity history of the child: comparing the intervention groups	204
4.47	Change in nutrient intake of the children (mean % RDA $\pm$ SE): comparing intervention and control groups	213
4.48	Change in nutrient intake in boys and girls: comparing intervention and control groups (mean % RDA $\pm$ SE)	214
4.49	Change in nutrient intake of the children (mean % RDA $\pm$ SE)	215
4.50	Change in nutrient intake in boys and girls (mean % RDA)	216
4.51	Mean increment in the weight (kg) of the children	221
4.52	Mean increment in the height (cm) of the children	222
4.53	Change in nutritional status of children by Weight-for-age (WAZ) Z score values	226
4.54	Change in nutritional status of children by Height-for-age (HAZ) Z score values	227
4.55	Change in nutritional status of children by Weight-for-height (WHZ) Z score values	228
4.56	Community based NEC interventions: impact on stunting more evident than impact on underweight	230
4.57	Community based NEC interventions: impact on child growth	233
5.1	Indicators and tools for data collection: Study I	240
5.2	Indicators and tools for process evaluation of the intervention	243
5.3	Indicators and tools for data collection pre-post intervention	244
5.4	Major responses regarding breastfeeding and complementary feeding	245
5.5	Major responses regarding health related beliefs and practices	246
5.6	Mean nutrient intake of the children (% RDA)	248
5.7	Change in awareness-practices of mothers regarding IYCF and Care: comparing intervention and control groups	253
5.8	Major reasons behind positive and negative change in feeding behaviours	256
5.9	Change in nutritional status of children	258
