

## LIST OF ABBREVIATIONS

|                      |                                      |
|----------------------|--------------------------------------|
| ABA                  | Absciscic acid                       |
| ANOVA                | Analysis of variance                 |
| AS                   | Adenine sulphate                     |
| BAP                  | Benzyl amino purine                  |
| 2,4-D                | 2,4-dichlorophenoxy acetic acid      |
| IEDC's               | Induced embryogenic determined cells |
| Kg / cm <sup>2</sup> | Kilogram per square centimeter       |
| KIN                  | Kinetin                              |
| uM                   | Micromolar                           |
| mM                   | Millimolar                           |
| MS                   | Murashige and Skoog's (1962) medium  |
| PEDC's               | Pre embryogenic determined cells     |
| RH                   | Relative Humidity                    |
| RSE                  | Repetitive somatic embryogenesis     |
