

C O N T E N T S

	<u>Page No.</u>
List of Tables	vi - x
<u>CHAPTER I</u>	
<u>Introduction</u>	1 - 19
1. Alkaloids	1
2. Alkaloid synthesis in plants ...	2
3. Role of alkaloids in plants ...	3
4. <u>Ergot alkaloids</u>	4
a) Pharmaceutical importance ...	5
b) Chemistry	7
c) Biogenesis of ergot alkaloids...	8
5. Plant tissue culture as a tool to study alkaloid production ...	11
<u>CHAPTER II</u>	
<u>Materials and Methods</u>	20 - 30
1. Plant material	20
2. <u>Culture medium</u>	
(a) Preparation of the media ...	20
(b) Culture vessels... ..	22
(c) Sterilization of media and culture vessels	22
3. <u>Aseptic Techniques</u>	
(a) Inoculation chamber	23
(b) Surface Sterilization	23
4. <u>Culture Techniques</u>	
(a) Initiation of leaf cultures ...	24
(b) Stock cultures... ..	25
(c) Suspension cultures	25

5. <u>Measurement of growth</u>		
(a) Fresh weight 	26
(b) Dry weight 	26
6. <u>Chemical Analysis</u>		
(a) Extraction and estimation of total alkaloid	26
(b) Chromatographic procedures ...		27
(i) Thin-Layer-Chromatography for alkaloid..	...	27
(ii) Paper Chromatography for amino acids		28
7. Enzyme assays 	29
8. Photography 	30

CHAPTER III

<u>Results</u>	31-121
Section A. "In vivo" Studies on alkaloid production in <u>Evolvulus alsinoides</u> L.		31
Section B. Initiation and establishment of callus from the leaves of <u>E. alsinoides</u> .		34
Section C-1. Influence of auxins on growth and alkaloid production in <u>E. alsinoides</u> callus cultures ...		35
C-2. Effect of cytokinin on growth and alkaloid production in <u>Evolvulus</u> callus cultures ...		38
C-3. Effect of Gibberellic acid on growth and alkaloid production in <u>Evolvulus</u> callus cultures		41
C-4. Effect of Auxin, cytokinin combinations on growth and alkaloid production in <u>Evolvulus</u> callus cultures 	41

Page No.

Section C-5. Periodical changes in growth and alkaloid production in MS medium supplemented with optimal hormonal concentrations in <u>Evolvulus</u> callus cultures ...	44
C-6. Tryptophan synthetase activity in <u>Evolvulus</u> static and suspension cultures ...	48
Section D. Influence of Inoculum : Volume ratio on growth and alkaloid production in <u>E. alsinoides</u> suspension cultures	50
Section E-1. Effect of different sugars on growth and alkaloid production in cell suspensions ...	52
E-2. Effect of sucrose levels on growth, alkaloid production and tryptophan synthetase activity in suspension cultures ...	54
Section F. Effect of total nitrogen level on growth and alkaloid production in suspension cultures ...	60
Section G. Effect of different levels of Micro-element and Macroelement salts on growth and alkaloid production	63
Section H. Effect of Tweens on growth and alkaloid production in <u>Evolvulus</u> suspension cultures ...	66
Section I. Effect of precursors on growth and alkaloid production in <u>Evolvulus</u> suspension cultures ...	72
I-1. Effect of L-tryptophan on growth, alkaloid production and tryptophan synthetase activity. ...	72

I-2. Effect of periodic addition of Tryptophan on growth and alkaloid production ...	77
I-3. Effect of 5-methyl tryptophan on growth, alkaloid production and tryptophan synthetase activity	80
I-4. Effect of DL-mevalonic acid on growth, alkaloid production and tryptophan synthetase activity	82
I-5. Effect of Methionine on growth, alkaloid production and tryptophan synthetase activity ...	85
I-6. Effect of Anthranilic acid on growth, alkaloid production and tryptophan synthetase activity. ...	87
I-7. Effect of Indole on growth, alkaloid production and tryptophan synthetase activity	87
I-8. Effect of DL-serine on growth, alkaloid production and tryptophan synthetase activity	90
I-9. Effect of DL-serine + Indole on growth, alkaloid production and tryptophan synthetase activity ...	94
Section - J. Studies on amino acids during the course of culture in <u>Evolvulus</u> suspension cultures ...	97
Section - K. Phosphate inhibition of alkaloid and its control by Tryptophan and its analogs in <u>Evolvulus</u> suspension cultures	99
K-1. Phosphate inhibition of alkaloid in <u>Evolvulus</u> suspension cultures	99

K-2. Effect of L-tryptophan on phosphate inhibited alkaloid production	105
K-3. Effect of Mevalonic acid on phosphate inhibited alkaloid production	107
K-4. Effect of 5-methyl tryptophan on phosphate inhibited alkaloid production	107
Section - L. Influence of cofactors of DMAT synthetase on growth and alkaloid production in <u>Evolvulus</u> suspension cultures	111
Section - M. Change in growth and alkaloid production with passages in culture of <u>Evolvulus</u> cell suspensions.	114

CHAPTER IV.

<u>Discussion</u>	117-146
Section - I. "In vivo" studies on alkaloid production in <u>Evolvulus alsinoides</u> L.	119
Section - II. A. Effect of cultural parameters on growth of tissue in <u>E. alsinoides</u> suspension cultures. ...	120
Section - II. B. Effect of cultural parameters on alkaloid production and tryptophan synthetase activity in <u>Evolvulus alsinoides</u> suspension cultures	127

CHAPTER V.

<u>SUMMARY</u>	141-146
BIBLIOGRAPHY	147-162
