

## APPENDIX — I

STANDARD CURVE FOR HAEMOGLOBIN ESTIMATION  
BY THE CYANMETHAEMOGLOBIN METHOD

## APPENDIX I

| TUBE NO. | Hb Std<br>(ml) | Drabkin's<br>Reagent<br>(ml) | Concentration | Sp.reading |
|----------|----------------|------------------------------|---------------|------------|
| S        | 0.0 (Blank)    | 5                            | 0.0           | -          |
| S1       | 1              | 4                            | 3.1           | 0.09       |
| S2       | 2              | 3                            | 6.2           | 0.18       |
| S3       | 3              | 2                            | 9.3           | 0.27       |
| S4       | 4              | 1                            | 12.4          | 0.36       |
| S5       | 5              | 0                            | 15.5          | 0.44       |

Factor  $3.1/0.09 = 34.4$
